Re: Washington County
William Putnam Property
Storm Water Construction Activity
Notice of Violation
0GC00394*AG

Mr. William H. Putnam
8734 Dupont Road
Washington, WV 26181

Dear Mr. Putnam:

On June 29, 2011, I performed an inspection of the site on Pearl St. in Marietta. The purpose of my inspection was to determine the compliance of this site with the National Pollutant Discharge Elimination System (NPDES) permit for discharges of storm water associated with construction activity. The inspection was conducted under the provisions of Ohio's water pollution control statues, Ohio Revised Code (ORC) Chapter 6111.

At the time of my inspection, the site was inactive and it appeared that construction activities had been completed. In accordance with the NPDES permit, a Notice of Termination (NOT) must be submitted to the Ohio Environmental Protection Agency (Ohio EPA) to release you from the terms and conditions of this permit.

An NOT may be submitted to Ohio EPA if the following requirements have been fulfilled:

1. A perennial vegetative cover (or equivalent means of stabilization) has been established over 100% of the surface area disturbed during construction. The vegetative growth must be at a growth density of 70%.

2. All temporary sediment and erosion controls have been removed and properly disposed.

3. All sediment has been permanently stabilized to prevent further erosion.

4. Construction activity at the site has ceased.

It appears that your site meets the above criteria. If you agree, please submit an NOT within 45 days of the completion of construction activities. Failure to submit an NOT is a violation of the permit requirements and may affect your ability to obtain an NPDES permit in the future.

Southeast District Office
2195 Front Street
Logan, OH 43138-8637
