Re: Construction Storm Water Inspection at Ohio Paperboard / Fairfield County
Permit Number 4GC03264*AG

Dear Mr. Doerr:

This letter is written in follow-up to a construction storm water inspection conducted by Elizabeth Schaller and Stephen Riley of Ohio EPA at Ohio Paperboard in Baltimore, Ohio on July 7, 2010. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit Associated with Construction Activities. The following was noted:

Sediment and Erosion Control:

- The sediment basin and perimeter controls for this site appear to be functioning as intended. Please be aware the general permit states that all sediment controls will be inspected and maintained every seven days or within 24 hours of a precipitation event equal to or greater than 0.5 inches to ensure continued effectiveness of the sediment basin.

Post Construction Requirements:

- The General Permit mandates specific water quality treatment for storm water following the completion of construction. Please be able to demonstrate your post construction requirements per the General Permit will be met. Please submit to my attention the water quality calculations demonstrating compliance. This information can be sent to my attention via a response letter, or to my email.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3844 or email at harry.kallipolitis@epa.state.oh.us.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
