## Agenda

#	Topic	Speaker
1	<p>Topic: Pressurized Condensate Storage Tanks</p> <p>If a facility plans to utilize pressurized, horizontal condensate tanks at the site, would they meet the exemption of OAC rule 3745-31-03(A)(1)(I)(ii)? The exemption pertains to: "Storage tanks for pressurized storage for inorganic compounds or propane, butane, isobutene, and liquid petroleum gases."</p>	Mike Hopkins/ Andrew Hall
2	<p>Steve Alspaugh, SEDO</p> <p>Some O&amp;G GP facilities are expressing a need to add additional tanks or additional engine capacity at existing GP sites.</p> <p>Cases by Case PTIOs are available but typically, are not conducive to the O&amp;G timeliness needs , so - were hoping there are some General Permit(s) on the way (in development) for additional 'tank-age' and/or engine(s) to better serve or O&amp;G customers.</p>	Mike Hopkins /Andrew Hall
3	<p>Steve Alspaugh, SEDO</p> <p>I also have a facility interested in the misc metal coating GP, any idea on when it will issued ??</p>	Mike Hopkins/ Andrew Hall
