Re: **Fiber-Tech Industries, Inc.**

NOV/RTC

Dear Mr. Mola:

On February 8, 2011, I inspected Fiber-Tech Industries, Inc.'s (Fiber-Tech's) facility located at 2000 Kenskill Ave. in Washington Court House, Ohio to determine Fiber-Tech's compliance with Ohio's hazardous waste laws and rules as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). The inspection included a review of company operations and written documentation, as well as a facility walkthrough.

At the time of my inspection, Fiber-Tech was not generating any hazardous waste at this location. However, the company was operating as a small quantity handler of universal waste and a used oil generator. During the inspection, I found the following violations of Ohio's universal waste and used oil rules.

1. **OAC Rule 3745-273-14(E), Labeling/marketing standards for small quantity handlers of universal waste:** Each universal waste lamp or a container or package in which such lamps are contained must be labeled or marked clearly with one of the following phrases: "Universal Waste-Lamp(s)," or "Waste Lamp(s)," or "Used Lamp(s)."

At the time of my inspection, the box of universal waste bulbs was not labeled with the words "Universal Waste - Lamps" or "Waste Lamps" or "Used Lamps."

- On February 17, 2011, Fiber-Tech e-mailed me documentation demonstrating that the box of universal waste bulbs was properly labeled. The violation was abated at that time.

2. **OAC Rule 3745-279-22(C)(1), Used oil storage requirements for generators:** Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil."

Mr. Roger Mola
Fiber-Tech Industries, Inc.

At the time of my inspection, the drums being used to store used oil were not clearly labeled or marked with the words "Used Oil."

- On February 17, 2011, Fiber-Tech e-mailed me documentation demonstrating that the drums being used to store used oil were marked with the words "Used Oil." The violation was abated at that time.

PROCESS DESCRIPTION SECTION

Give a general process description (include all processes at the facility)

Fiber-Tech Industries, Inc. (Fiber-Tech) manufactures fiberglass reinforced panels for a variety of industries, including the Transportation Industry, Building Panel Systems, Houseboat Panels, Insulated Panels, and much more. They operate at two separate locations in Washington Court House, Ohio. They specialize in manufacturing full length truck side panels, panels for truck bodies (e.g., U-Haul, Penske, Budget walls), and trailer roofs, among other products.

At 2351 Kenskill Ave., U.S. EPA ID# OHD009484718 (formerly Cor-Tec Inc. Plant 1), Fiber-Tech operates its laminating plant. At this location, the company receives 4' x 8' boards made of plywood or structural thermoplastic honeycomb material, etc., which are used as the product core. The boards are then stapled together to a designated size (usually 8-10 feet x 50-60 feet) and the woven fiberglass is cut to length. Next, the panel is assembled; the core material is laminated with glass and resin on each side. After the panel is completed, it is sent to Fiber-Tech's saw operation plant at 2000 Kenskill Ave., U.S. EPA ID# OHD000816991 (formerly Cor-Tec Inc. Plant 2) where it is cut into its final product size and distributed.

WASTE ACTIVITIES AND P2 SUMMARY SECTION

For each of the processes listed above that generate a waste give the following information: (1) name of process generating waste, (2) name or description of waste generated (e.g. sludge, solvent, ash, used oil, spent lamps, etc.), (3) EPA waste codes, if applicable, (4) quantity generated per month, (5) type of accumulation (container, tank, etc.) (6) waste accumulation location in facility, (7) type of on-site treatment (if used), (8) name of off-site management facility and type of waste management activity occurring there, (9) Current P2 activities, and (10) P2 opportunities.

2351 Kenskill Ave.

At the 2351 Kenskill Ave. laminating plant, Fiber-Tech was operating as a small quantity generator (SQG) of hazardous waste during my inspection. The company is in the process of disposing of old, unwanted catalyst (D001, D003). The facility generated and is accumulating approximately 900 lbs on site. It is being accumulated in the locked storage shed outside the factory building. Fiber-Tech has contracted with Univar to transport the hazardous waste off site to a permitted facility for incineration.

This waste was generated from a one-time event and not ongoing processes. After it is shipped off site, I do not anticipate this site generating any more hazardous waste, at least, in the immediate future. Prior to this waste generation event, no hazardous waste has been generated at the facility since an old lab cleanout in 2007. Thus, there were no required manifests or LDR notifications to review during the inspection.

Fiber-Tech cleans its laminating equipment by mopping it with acetone and then laundering the mops heads. No hazardous waste is generated from this cleaning process.

2000 Kenskill Ave.

At 2000 Kenskill Ave., Fiber-Tech houses its saw operation, maintenance area, and offices. No hazardous waste is generated at this location. However, the company does generate and store

used oil and universal waste lamps at this plant. Veolia Environmental Services manages the universal waste lamps and Grand Vista Oil manages the company's used oil.
