**CEI - Small Quantity Generator**  
**NOV - RTC**

Dear Mr. Ohashi:

On August 9, 2010, Ohio EPA conducted a compliance evaluation inspection (CEI) at the Krazy Glue Co. facility located at 1450 West Main Street, West Jefferson, OH to determine the facility's compliance with Ohio's hazardous waste regulations as found in Chapter 3734 of the Ohio Revised Code and Chapter 3745 of the Ohio Administrative Code (OAC). The CEI consisted of an inspection of facility operations and a review of associated documentation. During the CEI, Krazy Glue Co. was represented by you and various associates, while Ohio EPA was represented by me. We also discussed the importance of pollution prevention and Ohio EPA's willingness to assist Krazy Glue Co. in any environmental compliance matters.

As a result of the CEI, it was determined that Krazy Glue Co. was in violation of the following OAC rules:

1. **OAC Rule 3745-279-22(C), Used Oil Storage Requirements for Generators - Labels:** Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil."

The container of used oil located in the detached garage was not labeled with the words "Used Oil" at the time of the CEI. We discussed the appropriate labeling requirements stipulated for used oil.

On this day and in my presence, the container of used oil was appropriately labeled as required. No further action is needed in regards to this violation.

2. **OAC Rule 3745-273-14(E), Labeling/Marking - Standards for Small Quantity Handlers of Universal Waste:** Each lamp or a container or package in which such lamps are contained must be labeled or marked clearly with one of the following phrases: "Universal Waste - Lamp(s)," or "Waste Lamp(s)," or "Used Lamp(s)."

Lee Fisher, Lieutenant Governor  
Chris Korfeski, Director

Mr. Kenichi Ohashi

The containers of spent fluorescent light bulbs located in the upstairs area were not labeled as required at the time of the CEI. We discussed the appropriate labeling requirements for universal wastes, and specifically for spent fluorescent light bulbs.

On this day and in my presence, the containers of spent fluorescent light bulbs were appropriately labeled. No further action is needed in regards to this violation.

Due to the actions taken on the day of the CEI, Krazy Glue Co. abated each of the violations listed above and has been **returned to compliance**.

Enclosed, please find a copy of the checklists completed as a result of the CEI. Also enclosed and for your information, please find copies of the following documents: an article from Ohio EPA titled, "Reducing Solvent Purchase and Disposal Costs – Part II" which provides information on management of hazardous wastes associated with operation of a solvent distillation unit; and, OAC Rule 3745-51-01(C)(8) which is the rule that pertains to speculative accumulation and associated recycling of a material.

Please remember, the waste acetone must be managed in accordance with all applicable hazardous waste generator standards prior to being recycled in the distillation unit. As a small quantity generator (i.e., total hazardous waste generation between 100 and 1,000 Kg in a month), these management standards would include applicable labeling and dating of the containers of hazardous waste acetone, recycling of these wastes prior to the stipulated maximum accumulation time period, inspections and documentation of the hazardous waste accumulation area and emergency equipment, etc. Should your hazardous waste generator status change, the applicable management standards would also change.

If you have any questions or need additional information, I can be reached by telephone at 614-728-5037. Feel free to call anytime for assistance.

**NOTICE:** Ohio EPA's failure to list specific violations or deficiencies in this letter does not relieve Krazy Glue Co. from having to comply with all applicable regulations.

Respectfully,

Randy Sheldon

## PROCESS DESCRIPTION – WASTE MANAGEMENT

Krazy Glue Co. is located at 1450 W. Main Street, West Jefferson, OH 43162 in Madison County. Krazy Glue Co. is a supplier and/or manufacturer of adhesive products used throughout the world. The facility consists of a single large-main building with a detached small garage. Within the main building are the administrative area, a large production area, a large warehousing area, a laboratory QC room, an overhead area above the offices, and a mixing room. Krazy Glue Co. was issued hazardous waste generator ID number OHR000032946 and is currently a small quantity generator of hazardous waste.

The original product (cyanoacrylate) is produced in Japan and sent to this facility in 55-gallon metal containers. The cyanoacrylate is pumped from these containers and repackaged into small individual containers for personal consumer use (i.e. 2 gram packages). Specialized orders for industrial/manufacturing uses are also completed at this facility. Some of the specialized orders include the addition of alcohol and/or MEK to the product for faster drying or viscosity changes. Some of the special order adhesives are used in laminating processes for products such as sunroofs and sun glasses.

A satellite accumulation area is located in the hallway just through the curtained entrance/exit of the production area. In this general area are acetone and MEK associated wastes. Small amounts of these wastes may be generated in the production or laboratory areas (i.e., squirt bottles used for small cleaning functions, etc.) and then are placed into their respective containers. Wipers are placed in closed containers, and when completely dry, they are placed with the regular trash.

Acetone is used for cleaning of the associated packaging equipment. The equipment is dismantled and taken into the mixing room. Two (2) covered trough units are located within a large ventilation hood; one with clean acetone and one with a less clean product. Equipment is initially placed into the less clean acetone unit and subsequently transferred to the clean acetone unit for final cleansing. A small still unit is used to clean the acetone for reuse. This unit processes three (3) gallons at a time and can do three (3) cycles per day, except on Fridays. Acetone from the clean unit may be used in the less clean unit and/or recycled in the still and reused as needed. The still bottoms are managed with the hazardous waste acetone. A log of the recycling operation associated with the still use is maintained. To date, there have been no shipments of hazardous waste acetone in calendar year 2010.

Two (2) shipments of hazardous waste MEK (D001, D035, F005) have been shipped offsite for disposal in 2010. Shipments of 55 gallons and 140 liters were sent to Pollution Control Industries in East Chicago for management/disposal.

Lead acid batteries are exchanged through Batteries Plus.

Used electronic equipment is managed through the Ohio Mulch associated location(s). Batteries are not removed from electronic equipment and the entire intact unit is sent away for recycling.

Spent fluorescent light bulbs are managed through Krazy Glue Co.'s supplier, Gregory Electronics.

Used oil, located in the detached garage, is managed by Air Technologies.

Forklifts are managed by OKI.

Metal containers are recycled through Topy & Sons or Masser Metals.

Initially, the drum of used oil and the spent fluorescent light bulb containers were not labeled as required. During the inspection and in my presence, these containers were appropriately labeled.
