Re: Tuscarawas County
Lawver Construction
Storm Water Construction Activity
Notice of Violation
0GC01037*AG

Mr. Gary Lawver
1235 Lakeview Road
New Philadelphia, Ohio 44663

Dear Mr. Lawver:

On July 3, 2008 I visited your site on north east of Kelly Street. The purpose of the inspection was to determine the compliance of this site with the National Pollutant Discharge Elimination System (NPDES) permit for discharges of stormwater associated with construction activity. The inspection was conducted under the provisions of Ohio's water pollution control statutes, Ohio Revised Code (ORC) Chapter 6111. The following areas need to be addressed:

1. Part III.G.2.d.iv. of the permit states that sediment control practices must minimize the amount of sediment entering an active storm drain system, unless the system drains to a sediment settling pond. **The stormwater Inlet on Monroe street needs inlet protection.**
2. Part III.G.2.d.iii of the permit requires silt fence to be installed on a level contour. Silt fence should be utilized in accordance with the specification of the Rainwater and Land Development manual. **Silt fence is down in some areas around the site and needs to be repaired immediately.**

Sediment and erosion controls for your site must meet the guidelines and design criteria set forth in the above mentioned Rainwater and Land Development manual. A copy of this manual may be obtained by contacting the Ohio Department of Natural Resources, Division of Soil and Water Conservation, at (614) 265-6610.

Within fourteen (14) days of receipt of this letter, please submit to me at this office a written notification as to actions taken or proposed to eliminate violations of the permit. Your response should include the dates, either actual or proposed, for the completion of the actions. If you have any questions, please contact Aaron Wolfe at (740) 380-5277 or me at (740) 380-5418.

Sincerely,

Philip Webb
