Re: Tuscarawas County
Kimble Manufacturing Co., Inc.
Stormwater Construction Activity
Notice of Violation
0GC00975*AG

Mr. Phil Raber
Kimble Manufacturing Co., Inc.
P.O. Box 280
Midvale, Ohio 44653

Dear Mr. Raber:

On July 17, 2007, Nathan Weber, of this office, and I visited your site on Reiser Avenue. The purpose of the inspection was to determine the compliance of this site with the National Pollutant Discharge Elimination System (NPDES) permit for the discharge of stormwater associated with construction activity. The inspection was conducted under the provisions of Ohio's water pollution control statutes, Ohio Revised Code (ORC) Chapter 6111. The following areas need to be addressed:

1. **Three out of four sediments ponds were installed at the time of inspection. The fourth pond must be installed immediately.** In accordance with Part III.G.2.d.i. and Part III.G.2.h. of the permit, all sediment control structures shall be functional throughout the course of earth disturbing activities. Sediment controls should be in place prior to the onset of construction activities and must remain in place until the entire up slope area is stabilized.
2. **The silt fence was down in a few areas and needs to be properly reinstalled and maintained until construction is complete and the site is stabilized.** Part III.G.2.d.iii of the permit requires silt fence to be installed on a level contour. Silt fence should be utilized in accordance with the specification of the *Rainwater and Land Development* manual.
3. **The outfall from the largest pond needs to be protected with rip rap before the pond releases any discharge. One of the outfall outlets is clogged with sediment and needs to be cleaned.** Part III.G.2.b.ii. of the permit states that operators shall stabilize channels and outfalls to prevent erosive flows. Techniques may include seeding, mulching, erosion control matting, sodding, rip rap, or rock check dams.

Sediment and erosion controls for your site must meet the guidelines and design criteria set forth in the above mentioned *Rainwater and Land Development* manual. A copy of this manual may be obtained by contacting the Ohio Department of Natural Resources, Division of Soil and Water Conservation, at (614) 265-6610.

Within fourteen (14) days of receipt of this letter, please submit to me at this office a written notification as to actions taken or proposed to eliminate violations of the permit. Your response should include the dates, either actual or proposed, for the completion of the actions. If you have any questions, please contact me at (740) 385-8501 or Aaron Wolfe at (740) 380-5277.

Sincerely,

Michael Campbell
