Mr. Michael G. Green
President, Chief Operating Officer
Hadronics, Inc.
4570 Steel Place
Cincinnati, Ohio 45209

Dear Mr. Green:

On August 18, 2009, Ohio EPA conducted a compliance evaluation inspection (CEI) of Hadronics, Inc. facility located at 4570 Steel Place in Cincinnati, Ohio. As is our practice, the inspection was unannounced. Phil Robinson, Greg Larison and you represented Hadronics, and I represented Ohio EPA. Hadronics hazardous waste generator identification number is OHD050659366. Ohio EPA identified that Hadronics is operating as a large quantity generator of hazardous waste.

The CEI was conducted to determine Hadronics' compliance with Ohio's Hazardous Waste Laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Ohio EPA's CEI included an inspection of facility operations and a review of written documentation and records. During the inspection Mr. Robinson and I discussed ways to prevent pollution by reducing waste. This letter will explain the violations we found, what you need to do to correct the violations, other general concerns we have, what you need to do to respond to our general concerns, and the pollution prevention opportunities we identified.

Notice of Violation

The following violations of Ohio's hazardous waste laws were identified. In order to correct these violations you must do the following and send me the required information **within 30 days** of your receipt of this letter:

1. OAC Rule 3745-52-34 (C)(1)(b): Accumulation time of hazardous waste:

A satellite accumulation container holding hazardous waste shall be marked with the words "Hazardous Waste" or with the words that identify the contents of the containers.

During the inspection, a 55 gallon satellite accumulation hazardous waste steel drum containing plating mastic waste located in the Chrome Department of the

facility was not labeled. Therefore, Hadronics, Inc. is in violation of OAC Rule 3745-52-34 (C)(1)(b).

Prior to completing the CEI, the drum was labeled with the words "Plating Mastic Waste." Therefore, Hadronics, Inc. is no longer in violation of OAC Rule 3745-52-34 (C)(1)(b).

2. OAC Rule 3745-66-73 (A): Management of containers:

A container holding hazardous waste shall always be closed during storage, except when it is necessary to add or remove waste.

During the inspection, a 55 gallon satellite accumulation hazardous waste steel drum containing plating mastic waste located in the Chrome Department of the facility was open. The drum did not contain a lid. Therefore, Hadronics, Inc. is in violation of OAC Rule 3745-66-73 (A).

Prior to completing the CEI, the drum was closed by replacing the lid. Therefore, Hadronics, Inc. is no longer in violation of OAC Rule 3745-66-73 (A).

3. OAC Rule 3745-273-13 (D)(1), Waste Management – standards for small quantity handlers of universal waste:

A small quantity generator of universal waste must contain any lamp in containers or packages that are structurally sound, adequate to prevent breakage, and compatible with the contents of the lamps. Such containers and packages must remain closed and must lack evidence or leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

During the inspection, it was observed that Hadronics, Inc. had elected to store its waste lamps in cardboard boxes, however, at least one box was open. This is not an unacceptable method to manage waste lamps, in violation of OAC Rule 3745-273-13 (D)(1).

In order to abate this violation, Hadronics, Inc. must immediately close all containers used to store waste lamps. Please provide documentation (i.e. photograph) to demonstrate compliance with this rule.

4. OAC Rule OAC Rule 3745-273-14 (E), Labeling/markings – standards for small quantity handlers of universal waste:

President, Chief Operating Officer
Hadronics, Inc.

Each lamp or a container or package in which such lamps are contained must be labeled or marked clearly with one of the following phrases: "Universal Waste Lamp(s)," "Waste Lamp(s)," or "Used Lamp(s)."

During the inspection, some waste lamps were incorrectly labeled, in violation of OAC Rule 3745-273-14 (E).

In order to abate this violation, Hadronics must label or mark clearly each lamp or a container or package in which such lamps are contained with one of the above phrases. Please provide documentation (i.e. photograph) to demonstrate compliance with this rule.

General Comments

The following is provided for informational purposes only.

1. You may be able to further reduce the waste your company generates. Hadronics has found ways to recycle, reduce or eliminate the amount of waste that your company generates. One of these examples implemented at Hadronics is listed below:
 - Chromax mist eliminator installed approximately 2005.

As discussed during the inspection, the Ohio EPA Office of Compliance Assistance and Pollution Prevention (OCAPP) provides answers and information to all businesses about environmental regulations, compliance, and pollution prevention. If you would like a free, non-regulatory on-site pollution prevention assessment or if you would like more information about pollution prevention, please contact OCAPP at (614) 644-3469. Information on pollution prevention assessments can be obtained through the following OCAPP web site:

<http://epa.ohio.gov/ocapp/p2/p2assmnt.aspx>.

Additional pollution prevention topics such as metal finishing and metal fabricating can also be obtained through the following OCAPP web site:

<http://epa.ohio.gov/ocapp/topics.aspx>.

2. Although no violation was cited, Hadronics must be cognizant of maintaining adequate aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment and decontamination equipment to any area of facility operation in an emergency. Both the 90-day hazardous waste

accumulation and shipping/receiving areas are located in the same area of the facility. During the inspection, several wooden crates were being stored near two hazardous waste drums. There appeared to be adequate aisle space maintained between the crates and the hazardous waste drums, however, since the 90-day hazardous waste accumulation area is shared with shipping and receiving particular attention must be given to assure adequate aisle space is maintained at all times. Also, caution must be taken to prevent any crates, forklifts or other objects from striking a drum causing potential harm to an individual and/or a release of hazardous waste to the environment.

I appreciate the time and effort of you and your staff during the entrance interview, facility walk-through, document review, and exit interview. Enclosed you will find a copy of the checklists that I completed for the inspection. You can find copies of the rules and other information on the Ohio EPA Division of Hazardous Waste Management's web page at <http://epa.ohio.gov/Default.aspx?alias=epa.ohio.gov/dhwm>. If you have any questions, please call me at (937) 285-6456.

Sincerely,

Jeffery H. Stark

DOES NOT APPLY TO CESQGS**

GENERAL REQUIREMENTS

- | | | |
|----|--|--|
| 1. | If LDRs do not apply, does the generator have a statement that lists how the HW was generated, why LDRs don't apply and where the HW went? [3745-270-07 (A)(7)] | Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/> |

NOTE: This is done by determining if the HW /soil contains levels of constituents greater than the levels given in its LDR treatment standard in 3745-270-40. However, if a specific treatment method is given in 3745-270-40 for the HW, no determination is required [3745-270-07 (A)(1)(b)]. If soil, generator can choose to have soil treated to LDR levels given in 3745-270-49 (alternative treatment levels for soils).

|----|---|--|

NOTE: This is done by evaluating which underlying hazardous constituents (UHC) are in the HW at levels above the universal treatment standards given in 3745-270-48. This requirement does not apply to high total organic carbon (i.e., contains >10% TOC) D001 wastes or listed HWs.
