Re: Compliance Inspection - Notice of Violation and Return to Compliance
Large Quantity Generator
US EPA ID# OHD987002490

Dear Ms. Mull:

On August 9, 2011, I met with you to inspect the Three Bond facility located at 6184 Schumacher Park Drive in West Chester, Ohio to determine compliance with Ohio's Hazardous Waste Laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). As a result of the inspection, one violation was cited.

1. Accumulation Time of Hazardous Waste (OAC Rule 3745-52-34(A)(2) – Dating of Drums

A generator who accumulates a hazardous waste, must place the date upon the container when each period of accumulation begins and is clearly marked and visible. During the inspection, a full 55 gallon drum in the hazardous waste storage cage was not dated with the accumulation start date. (Note: A satellite accumulation drum does not require dating until the start date begins, which is at the moment the 55 gallon limit is reached.) The actual start date was determined during the inspection and the date was marked on the container, therefore Three Bond is **Returned to Compliance** at this time.

Enclosed are copies of the checklists filled out for this inspection. You can find copies of our rules and other information on the division's web page at www.epa.state.oh.us. If you have any questions, please call me at (937) 285-6594.

Sincerely,

Thomas E. Koch

However, if a specific treatment method is given in 3745-270-40 for the HW, no determination is required [3745-270-07(A)(1)(b)]. If soil, generator can choose to have soil treated to LDR levels given in 3745-270-49 (alternative treatment levels for soils).
