RE: Complaint Investigation – OHD052150703

Dear Mr. Brennan:

On January 7, 2009, Ohio EPA conducted a return to compliance inspection of Core Molding Technologies (Core Molding). Jeff Hucke and Trent Dikeman represented Core Molding. I represented Ohio EPA. Based on the inspection and documentation submitted on November 25, 2008, Core Molding has adequately demonstrated abatement of the remaining violations discovered during the September 8, 2008 inspection:

- 1. **Hazardous waste determination, Ohio Administrative Code (OAC) 3745-52-11.** Core Molding inventoried and characterized the containers of waste in trailer #43. The analytical procedures conducted by the laboratory (Heritage Environmental Services) did not comply with OAC 3745-51-24. However, after discussions with Heritage, it seems that the analytical that was performed along with profile and material safety data sheet information provided, meets the requirements of generator knowledge.
- 4. **Inspections, OAC 3745-66-74**
- 5. **Testing and maintenance of equipment, OAC 3745-65-33**
- 6. **Annual report, OAC 3745-52-41(A)**
- 7. **Content of contingency plan, OAC 3745-65-52(A), (C), (D), (E), and (F)**
- 8. **Waste management – standards for small quantity handlers of universal waste, OAC 3745-273-13(D)(1)**

General Comment

- 1. During the follow-up inspection, Core Molding had the return copies of manifests and the proper land disposal restriction notifications. These copies were previously stored at Core Molding's corporate office in Columbus, Ohio. From now on, Core Molding in Batavia will retain the return manifests and any land disposal restriction forms on site.
