Re: Complaint Investigation-Bill's Towing and Auto Repair

04R000151928

Dear Mr. Smith:

On December 2, 2008, Ohio EPA visited your shop in regard to a complaint received by our office alleging the dumping of used motor oil at your business. There were two drums containing used oil and information was provided regarding your used oil transporter. Based upon the inspection of your shop and lot, the complaint was deemed to be unfounded. However, the following violation of Ohio's hazardous waste rules was noted:

Used Oil Storage Requirements for Generators., OAC 3745-279-22(c)(1): This rule states that containers and aboveground tanks used to store used oil shall be labeled or marked clearly with the words "Used Oil". During the inspection, it was noted that two containers of used oil located outside your shop were not labeled as required by this rule. **The violation was corrected at the time of the inspection.**

Enclosed you will find a copy of the checklist that was completed during the inspection. I have also enclosed an environmental compliance guide for auto repair shops. You can find copies of the rules and other information on the division's web page at www.epa.state.oh.us/dhwm Ohio EPA also has helpful information about pollution prevention at the following web address: www.epa.state.oh.us/opp. Should you have any questions, please feel free to contact me at (937) 285-6083.

Sincerely,

Brian Marlatt
Division of Hazardous Waste Management

List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page if more space is needed. If there are more than 7 waste codes and they are the same as listed in the most recent RCRAInfo source record, you do not need to list them all. Instead just indicate the date of the most recent source record.
