**Re: Armor Metal Group Mason, Inc; Hazardous Waste; Warren County;  
OHD987001732**

Dear Mr. Vonbargen:

On September 4, 2008, Ohio Environmental Protection Agency (Ohio EPA) conducted a compliance evaluation of Armor Metal Group Mason, Inc (Armor) to determine your compliance with Ohio's hazardous waste laws and regulations as found under the Ohio Revised Code (ORC) and the Ohio Administrative Code (OAC). A follow-up inspection was conducted on September 12, 2008. Ohio EPA's inspections included an inspection of facility operations and a review of written documentation and records. During the inspections we also discussed pollution prevention and waste reduction. This letter will explain the violations we found and what you need to do to correct the violations.

**Weekly Inspections – OAC 3745-66-74**

Armor is in violation of OAC 3745-66-74 for failing to conduct the required weekly inspections of the container accumulation area. These inspections are required to be completed once every seven (7) day period.

**Please immediately begin to conduct and record these inspections. A re-inspection will be conducted to verify your return to compliance.**

**Satellite Accumulation – OAC 3745-52-34(C)(2)**

Armor is in violation of OAC 3745-52-34(C)(2). A 55 gallon drum used to collect hazardous waste was found in the satellite accumulation area full but not dated. A new drum was put into service prior to the dating and removal of the full drum resulting in the storage of hazardous waste in excess of 55 gallons in the satellite accumulation area.

**The container was dated and moved to the <180 day storage to correct this violation. Ohio EPA verified this at the time of the September 12, 2008 inspection. No further action is required to address this violation.**

**Used Oil - OAC 3745-279-22 (B)**

Armor is in violation of OAC 3745-279-22 (B). Some of the used oil containers we observed were not labeled with the words "used oil".

**This violation was corrected at the time of the inspection by the addition of the label. No further action is required.**

**Universal Waste - OAC 3745-273-13(D)(1)**

Armor's contractor failed to provide a new box to store waste lamps after the last pick-up and Armor placed the bulbs in an open top drum. The result was that Armor is in violation of OAC 3745-273-13(D)(1) which requires a small quantity handler manage universal waste lamps in containers or packages that are structurally sound, adequate to prevent breakage, and compatible with the contents of the lamps. Such containers and packages must remain closed and must lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions. Armor was storing universal waste lamps in a container that was not closed and in a manner which left them sticking out of the top of the container, creating a risk of breakage.

**This violation was corrected by repackaging the waste lamps and verified at the time of the September 12, 2008 inspection. No further action is required.**

**Manifest Requirements**

We discussed waste disposal practices, shipping, and manifesting. One issue that was unresolved is your compliance with the land disposal restrictions found in OAC 3745-270. **Please provide documentation regarding the waste shipments and compliance with land disposal restrictions.**

We also discussed the parts washer and the solvent use in that unit. You mentioned the service provided Armor by your contractor and the solvent reclamation from the parts washer. **Please provide information about the solvent showing it is non-hazardous or provide information regarding the contractual agreement with the company providing reclamation services.**

**Pollution Prevention**

You may be able to reduce the waste Armor generates. If you find ways to recycle, reduce, or altogether eliminate the amount of waste that you generate you may be able to reduce treatment and disposal costs, and you may possibly reduce your regulatory requirements. We discussed pollution prevention during the inspection; however, we

Tom Vonbargen

did not identify any pollution prevention opportunities within your operations beyond the actions already taken by Armor. For other possible pollution prevention opportunities please visit our Office of Compliance Assistance and Pollution Prevention's (OCAPP) website at <http://www.epa.state.oh.us/ocapp>. We discussed the services OCAPP provides and I will inform them of your desire for an on-site pollution prevention assessment.

The Division of Hazardous Waste Management has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign-up for this free service. You can find more information at the following web address: [www.epa.state.oh.us/dhwm/listserv.html](http://www.epa.state.oh.us/dhwm/listserv.html). Please feel free to share this information with your colleagues. You can find copies of the rules, compliance checklists, and other information on the division's web page at [www.epa.state.oh.us/dhwm](http://www.epa.state.oh.us/dhwm).

Copies of the checklists completed for this inspection are attached. A reinspection will be conducted to review the required weekly inspection documentation for the hazardous waste storage area. Please provide, as a response to this letter, the information requested under the manifest requirements heading above. Should you have any questions, please contact me at (937) 285-6083.

Sincerely,
