Re: Graham Packaging Inspection

Dear Mr. Grosser:

Thank you for accompanying Mari Piekutowski and myself during Ohio EPA's inspection of Graham Packaging's facility in Mason, Ohio. Ohio EPA inspected Graham Packaging to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). This inspection letter is separate from the voluntary audit disclosure evaluation. During the inspection, it was determined that Graham Packaging is a Conditionally Exempt Small Quantity Generator (CESQG) of hazardous waste. The following violations of Ohio's hazardous waste laws were found:

1. **OAC Rule 3745-273-14(E) - Labeling/markings standards for small quantity handlers of universal waste:** Each lamp or a container or package in which such lamps are contained must be labeled or marked clearly with one of the following phrases: "Universal Waste- Lamps(s)", or "Waste Lamps(s)", or "Used Lamps(s)."

Graham failed to comply with this regulation in that spent fluorescent lamps were stored in a box marked "Used Light Bulbs" and not one of the phrases listed in the rule. **At the time of the inspection Graham Packaging marked the containers "Used Lamps" returning them to compliance with this rule.**

2. **OAC Rule 3745-279-22(C)(1) - Used oil storage requirements for generators:** Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil".

Graham failed to comply with this regulation in that a tote used to collect used oil was not labeled or marked with the words "Used Oil". **At the time of the inspection Graham Packaging marked the tote with the words "Used Oil" returning them to compliance with this rule.**

CRO Notice of Violation

Mr. David Foulkes
IKO Production, Inc.
3960 Clifton Avenue
Cincinnati, Ohio 45220

Dear Mr. Foulkes:

On November 13, 2008, I met with Donnette Fisher of the City of Franklin, Ohio and Brian Baugh of Good Enterprises to conduct an inspection of the former IKO Production facility located at 1200 South Main Street, Franklin, Ohio 45005. The IKO Production facility was inspected to determine its compliance with Ohio's Cessation of Regulated Operations (CRO) laws as found under Chapter 3752 of the Ohio Revised Code (ORC) and Chapter 3745-352 of the Ohio Administrative Code (OAC). The CRO program is a set of laws designed to prevent companies from abandoning facilities where regulated substances were used, stored, or treated. The laws require the responsible parties to secure these facilities until all regulated substances are removed. This letter will explain the violations we found, what you need to do to correct the violations, other general concerns we have and what you need to do to respond to our general concerns.

The IKO Production facility was a manufacturer of asphalt shingles and coating materials. On August 5, 2008, IKO Production submitted EPA Form 0327 which indicated regulated operations had ceased on August 1, 2008. According to Donnette Fisher, later this year ownership of this property was transferred to the City of Franklin, Ohio. Currently, the City of Franklin is leasing the property to Good Enterprises. Our inspection included a complete walk-through of the entire facility and the inspection of remaining stationary items.

We found the following violation of Ohio's CRO laws. In order to correct this violation you must do the following and send me the required information **within 30 days** of your receipt of this letter.

- 1. Duties of Owner/Operator within 90 Days of Cessation (ORC §3752 and OAC Rule 3745-352-20)**

Not later than 90 days after cessation of regulated operations, the owner/operator must remove from the facility all regulated substances and all debris, nonstationary equipment and furnishings, nonstationary containers, and motor vehicles and rolling stock that contain or "contaminated with" regulated substances, as defined in rule 3745-352-05 of the Administrative Code.

IKO Production was the owner/operator at the time regulated operation ceased. IKO Production was responsible for removing all regulated substances by October 30, 2008. IKO Production has failed to remove all regulated substances at the facility. At the time of the inspection, containers of chemicals (i.e. five gallon bucket of paint, cans of WD-40, Naturesol, aerosol paint cans) were located throughout the facility. Also, several containers of chemicals (i.e. Naturesol, sulfuric acid, heat transfer oil, mineral oil, N-Hexadecane 95%) were identified in what appeared to be the former "lab room". According to Mr. Baugh, the containers of chemicals are being temporarily stored in the lab room until a decision could be made as to whether the materials would be used or discarded.

IKO Production must coordinate with the City of Franklin to ensure the following activities are conducted: Immediately inventory all materials throughout the facility that were being managed at the time IKO Production ceased operations. Any material determined to be waste must be characterized to determine if it is a hazardous waste. For non-waste, please provide information as to how this material will be lawfully transferred to another facility that IKO Production operates or lawfully transferred to another person. Once all waste is inventoried and characterized, it will be necessary to dispose of it properly and provide this office with the applicable documentation such as a manifest, bill of lading or similar document showing what was done with the waste materials.

As a business owner, it is important to know whether you generate a hazardous waste. First you must know when a material becomes a waste. Generally, a waste is any discarded material that is not excluded by rule or other legal mechanisms. If you have a material that you can no longer use, it is probably a waste. If you produce a waste that is hazardous, you are a hazardous waste generator and must comply with applicable Ohio hazardous waste laws as found in Chapter 3734 of the ORC and Chapter 3745 of the OAC. I would encourage you to consult the guidance document titled "Hazardous Waste Generator Handbook." This document provides an overview of rules for hazardous waste management. A copy of this document can be found through our web site:

<http://www.epa.state.oh.us/dhwm/pdf/genhandbook.pdf>.

An additional document, "Identifying Your Hazardous Waste," is also available at our web site: <http://www.epa.state.oh.us/ocapp/sb/publications/identifyingwaste.pdf>.

This document provides an overview of rules for hazardous waste identification.

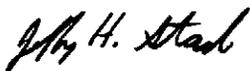

Mr. David Foulkes

Page 3

You are responsible for your hazardous waste from "cradle to grave." This means that your business will be held responsible for cleanup or pursued in an enforcement action if your hazardous waste is mismanaged by another company, even after it leaves your property. Therefore, it is very important for you to select a qualified recycler or treatment, storage and disposal (TSD) facility to accept your company's hazardous waste. Any facility in Ohio that accepts hazardous waste for treatment, storage or disposal must have an Ohio EPA permit for these activities. The permit outlines the operating conditions and recordkeeping procedures that must be followed to ensure that wastes will be handled properly. Additional guidance regarding this matter can be found in Appendix 5 of the "Hazardous Waste Generator Handbook."

As a notifier of regulated waste activity, we understand that you still need your EPA ID number and will not deactivate it until you have notified us in writing.

Within 30 days of your receipt of this letter, provide an inventory of all materials throughout the facility that were being managed at the time IKO Production ceased operations and a schedule of when you expect to have all waste characterized. Enclosed you will find a copy of the checklists that were completed during the inspection. Should you have any questions, please feel free to call me at (937) 285-6456. You can find copies of the laws and other information on the division's web page at <http://www.epa.state.oh.us/dhwm>.
