Mr. Michael Summers

CERTIFIED MAIL

Dear Mr. Summers:

On June 26, 2009, Ohio EPA conducted a compliance evaluation inspection of Akron Paint and Varnish Inc's (APV), Akron facility to determine APV's compliance with Ohio's hazardous waste laws and regulations as found under the Ohio Revised Code and the Ohio Administrative Code ("ORC" and "OAC" respectively). APV was represented by Tom Venarge, Ed Aspega, Eric Rumley and you. Ohio EPA was represented by Suzanne Prusnek and me. Ohio EPA's compliance inspection included an inspection of the facility operations and a review of written documentation.

Based on this inspection, Ohio EPA has determined that APV has violated at least the following state hazardous waste regulations:

Violations:

1. ***Daily Tank Inspections, OAC rule 3745-66-95(C):*** The facility must conduct daily inspections of the following portions of the tank systems (as applicable): spill control equipment, above ground portion of the tank, data from leak detection equipment and construction materials and area immediately surrounding the tank for signs of erosion or release of hazardous waste.

APV was not conducting these inspections on the weekends and holidays.

You stated that you would train the security guards to conduct these inspections on the weekends and holidays.

Please submit documentation that the guards have been trained and have started conducting the inspections to abate this violation.

2. ***Packaging of Universal Waste Lamps, OAC rule 3745-273-13(D)(1):*** Universal waste lamps must be contained in containers or packages that are structurally sound, adequate to prevent breakage, and are compatible with the contents of the lamps. In addition, the containers or packages must be closed, lack evidence of leakage, spillage or damage that could cause leakage.

During the inspection, the boxes of lamps were open. You had the boxes closed during the inspection abating the violation. You also stated that the workers who closed the boxes during the inspection are the employees who manage your universal waste lamps. They have been instructed to keep the boxes closed.

Based on this, the violation is abated and no further action is required.

In addition, Ohio EPA has the following concerns:

3. Ohio EPA questioned whether or not the waste methylene chloride sent to Hukill as a non hazardous waste should have been managed as a listed hazardous waste. Ohio EPA exchanged several e-mails with your consultant, Barb Knecht of HzW and it was determined that the waste characterization of non-hazardous was correct. Ohio EPA cautions you to be sure that if there ever is a similar situation that a clearer description is used.
4. APV sends their used oil to Rice Oil in Akron, Ohio. During the inspection, Ohio EPA asked you if Rice Oil had a US EPA identification number as required by the rules. You did not know if they had an identification number nor did you know what they do with your used oil. Ohio EPA has been able to determine that Rice Oil does have an identification number. Per our information, they are only a transfer facility. APV should still determine how their used oil is managed after it leaves the site.
5. The hazardous waste accumulation area had limited aisle space due to the excess spill control equipment being stored in the fenced area. You stated that the spill control could be moved opening up more space. This should alleviate any future questions as to whether or not the aisle space is adequate to provide for unobstructed movement of emergency or spill control equipment and to facilitate the weekly inspections.
6. We had a discussion with you regarding the waste characterizations of some of your waste streams. Specifically the paint sludges, waste resins and solid waste rags, which include the in line paint filters. You are currently managing all of these as "F" listed hazardous wastes. Based on the descriptions you provided Ohio EPA during the inspection, these waste streams do not meet the "F" listings for a spent solvent. The listing for a spent solvent (F001, F002, F003, F004 and F005) apply only to solvents which have become contaminated through use. I told you that if you would like additional assistance with this, I would be happy to assist. If you would prefer the assistance of our Office of Compliance Assistance and Pollution Prevention, I have included a brochure. In addition, see the information below.

If you would like a free, non-regulatory on-site pollution prevention assessment or if you would like more information about pollution prevention, please contact Adrienne LaFavre at (330) 963-1250. Ohio EPA has helpful information about this at the following web address: <http://www.epa.state.oh.us/ocapp/ocapp/>

**GENERATOR LDR CHECKLIST
DOES NOT APPLY TO CESQGS**

GENERAL REQUIREMENTS

- | | | |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| 1. | If LDRs do not apply, does the generator have a statement that lists how the HW was generated, why LDRs don't apply and where the HW went? [3745-270-07 (A)(7)] | Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/> |
| 2. | Did the generator determine if the HW/soil must be treated to meet the LDR treatment standard prior to disposal? Generator knowledge or testing may be used. [3745-270-07(A)(1)] | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/> |

NOTE: This is done by determining if the HW /soil contains levels of constituents greater than the levels given in its LDR treatment standard in 3745-270-40. However, if a specific treatment method is given in 3745-270-40 for the HW, no determination is required [3745-270-07 (A)(1)(b)]. If soil, generator can choose to have soil treated to LDR levels given in 3745-270-49 (alternative treatment levels for soils).

- | | | |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| 3. | Does the generator have documentation of how he determined whether the HW/soil meets or does not meet the LDR treatment standard in 2, above? [3745-270-07(A)(6)(a) or 3745-270-07(A)(6)(b)] | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/> |
| 4. | Does the generator keep the documentation required in #2, above, on-site for at least three years from the last date the HW/soil was sent on-site/off-site for treatment/disposal? [3745-270-07(A)(8)] | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/> |
| 5. | Does the generator generate a listed HW that exhibits a characteristic? If yes, | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/> |
| a. | Did the generator determine if the listed HW exhibits a characteristic that is not treated under the LDR treatment standard for the listed HW? [3745-270-09(A)] | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/> |

FOR EXAMPLE: F006 that exhibits the characteristic for silver or K062 that is corrosive, D002. Review LDR treatment standard in 3745-270-40 to determine what constituents the listed HW is treated for.

- | | | |
|----|-------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| 6. | Did the generator determine if its characteristic HW contains underlying hazardous constituents that need to be treated? [3745-270-09(A)] | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/> |
|----|-------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|

NOTE: This is done by evaluating which underlying hazardous constituents (UHC) are in the HW at levels above the universal treatment standards given in 3745-270-48. This requirement does not apply to high total organic carbon (i.e., contains >10% TOC) D001 wastes or listed HWs.

NOTE: Written documentation of this determination is not required.

- | | | |
|----|-----------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| 7. | Did the generator treat his HW /soil on-site to <u>meet</u> the LDR treatment standard? | Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/> |

NOTE If "Yes" see question #16.

- | | | |
|-----|------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| 8. | Did the generator send a one-time LDR notification form to the TSD with the first shipment to that facility?[3745-270-07(A)(2)] | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/> |
| 9. | Did the generator resubmit the LDR notification form to the TSD when the HW changed or the generator used a new TSD? [3745-270-07(A)(2)] | Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/> |
| 10. | Does the generator have a copy of the LDR notification form on file?[3745-270-07(A)(2)] | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/> |
| a. | Is the form kept on file for three years after last HW shipped? [3745-270-07(A)(8)] | Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/> |
