RE: ALCHEM CORP.  
OHR 000 006 759  
MEDINA COUNTY  
SQG>>CESQG/CEI/NOV/RTC

Mr. Bill Eberling  
Alchem Corp.  
525 W Liberty Street  
Medina, OH 44256

Dear Mr. Eberling:

On April 22, 2010, Ohio EPA conducted a compliance evaluation inspection of Alchem Corp's, Medina facility to determine Alchem's compliance with Ohio's hazardous waste laws and regulations as found under the Ohio Revised Code and the Ohio Administrative Code ("ORC" and "OAC" respectively). Alchem was represented by Mary Djordjevic and you. The Ohio EPA was represented by Suzanne Prusnek and me. The Ohio EPA's compliance inspection included an inspection of the facility operations and a review of written documentation.

The inspection included reviews of facility records, interviews with facility personnel and facility walk-through. The results of these reviews are discussed below.

Alchem was a conditionally exempt small quantity generator (CESQG) of hazardous waste at the time of the inspection (generating between 0 and 220 pounds of hazardous waste in a calendar month). Consequently the inspection was for compliance with the CESQG requirements.

Based on the facility documents reviewed and observations made during the facility walk-through, Ohio EPA has determined that Alchem has violated the following state hazardous waste regulations.

1. **Packaging of Universal Waste Lamps, OAC rule 3745-273-13(D)(1):** Universal waste lamps must be contained in containers or packages that are structurally sound, adequate to prevent breakage, and are compatible with the contents of the lamps. In addition, the containers or packages must be closed, lack evidence of leakage, spillage or damage that could cause leakage.

During the inspection, none of the spent lamps were in containers that were closed.

You closed both of the boxes during the inspection abating the violation.

No further action is required.

2. **Labeling/marking- standards for small quantity handlers of universal waste, OAC rule 3745-273-14(E):** Universal waste [fluorescent] lamps shall be labeled as "Universal Waste - Lamps," "Waste Lamp(s)", or "Used Lamp(s)."

None of the universal waste lamp boxes were labeled at the time of the inspection.

You marked the boxes with the appropriate labels during the inspection abating the violation.

No further action is required.

3. ***Accumulation Time for Universal Waste, OAC 3745-273-15(C)***: The length of time universal waste is stored must be documented in some manner.

Alchem did not have a method for demonstrating how long the universal waste was on site.

The boxes were marked with an accumulation date abating the violation.

No further action is required.

### **Concerns**

4. There was a blue poly drum outside which appeared to contain rain water. Please confirm the contents of this container and submit documentation as to how the water is to be disposed (e.g. will Medina County allow disposal via the sanitary sewer).
5. The hazardous waste generated by Alchem is from plating bath samples being submitted by customers to Alchem to determine what chemical changes could be made to the baths to extend their viability. The sample that remains from any plating baths that would need to be managed as a listed hazardous waste if disposed by the customer would also need to be managed as a listed hazardous waste. Per our telephone conversation on May 4, 2010, the only samples that would need to be managed as a listed hazardous waste are those samples from a cyanide plating bath solution from electroplating operations. These samples would need to be managed as F007.

To eliminate this waste stream, Alchem could return the samples to the customers. The customers, now knowing how to improve the quality of their plating baths could return the sample to the baths and implement the improvements.

Another option would be for Alchem to retain the samples and use that material in the make-up of the next production run. Since the chemistry is known, if any adjustments are necessary, they could be made in the production.

6. Alchem generates a nickel waste. Again, these samples could be returned to the customers. Otherwise, Alchem may want to research companies who may be able to recycle the nickel from the waste.

The Division of Hazardous Waste Management has created an electronic news service to provide you with updates related to hazardous waste activities in Ohio. You can find more information and sign up for this free service at the following Web link <http://ohioepa.custhelp.com/cgi-bin/ohioepa.cfg/php/enduser/doc/serve.php?2=subscriptionpage>.
