Ms. Ami Appling
Human Resources Manager
Estabrook Assembly SVC, Inc.
P.O. Box 804
700 W. Bagley Road
Berea, Ohio 44017

Dear Ms. Appling:

On April 14, 2011, Ohio EPA conducted a compliance evaluation inspection of Estabrook Assembly SVC, Inc. (EASI) and Estabrook Corp. (Estabrook), both located at 700 W. Bagley Road, Berea to determine their compliance with Ohio's hazardous waste laws and regulations as found under the Ohio Revised Code and the Ohio Administrative Code ("ORC" and "OAC" respectively). You represented both facilities. The Ohio EPA was represented by Ed D'Amato and me. The Ohio EPA's compliance inspection included an inspection of the facility operations and a review of written documentation.

At the time of the inspection, neither EASI nor Estabrook were generating hazardous waste. Estabrook was generating used oil and universal waste.

No violations were noted for EASI.

Based on this inspection, Ohio EPA has determined that Estabrook has violated at least the following state hazardous waste regulations:

Violations:

1. ***Labeling/marketing- standards for small quantity handlers of universal waste, OAC rule 3745-273-14(E):*** Universal waste [fluorescent] lamps shall be labeled as "Universal Waste - Lamps," "Waste Lamp(s)," or "Used Lamp(s)."

The universal waste lamp box was not labeled at the time of the inspection.

During the inspection you labeled the box abating the violation. No further action is required.

2. **Packaging of Universal Waste Lamps, OAC rule 3745-273-13(D)(1):** Universal waste lamps must be contained in containers or packages that are structurally sound, adequate to prevent breakage, and are compatible with the contents of the lamps. In addition, the containers or packages must be closed, lack evidence of leakage, spillage or damage that could cause leakage

The box of lamps was open at the time of the inspection. You taped the box closed abating the violation.

No further action is required.

3. **Used Oil Storage Requirements for Generators, OAC rule 3745-279-22(C):** All containers and above ground tanks of used oil shall be clearly labeled or marked "Used Oil."

None of the containers of used oil were labeled with the words "used oil."

You labeled all of the containers during the inspection abating the violation. No further action is required.

In addition, Ohio EPA has the following concerns:

1. Ohio EPA suggested that you contact the receiver of their fluorescent bulbs to determine if the receiver can manage an accidentally broken lamp as universal waste. If they can accept accidentally broken lamps, Watt needs to determine if the receiver would prefer special packaging related to the broken lamp.
2. Ohio EPA noted runoff from the tank storage area on the west side of the building. Based on this observation, I had conversations with Dan Bogoevski with Ohio EPA's Division of Surface Water. EASI is subject to the NPDES permit program for industrial storm water. But, like any other industrial facility, if your areas of industrial activity are not exposed to storm water, you can submit a No Exposure Certification rather than getting a permit. Areas that would need to be reviewed for exposure include manufacturing, storage, processing and material handling areas. You should look at all raw material, intermediate products and finished goods. Finished goods that are intended for outdoor use with little to no risk of causing storm water pollution would not constitute exposure. There are also exemptions for waste containers. A facility can still qualify for "no exposure" if the dumpster is lidded, kept closed when not in use, is in good condition (no leaks or holes), and there is no material spilled around the dumpster. Drums and

other containers can also be stored outdoors and not disqualify a facility as long as the containers are sealed, there are no spigots or valves, and no material is added to or removed from the container while it is outdoors.

I would strongly encourage you to contact Dr. Adrienne LaFavre with the Office of Compliance Assistance at (330) 963-1250 to help you address this situation. In addition, Dr. LaFavre can provide a free, non-regulatory on-site pollution prevention assessment. Ohio EPA has helpful information about this at the following web address: <http://www.epa.state.oh.us/ocapp/ocapp/>.

The Division of Hazardous Waste Management has created an electronic news service to provide you with updates related to hazardous waste activities in Ohio. You can find more information and sign up for this free service at the following Web link: http://ohioepa.custhelp.com/cgi-bin/ohioepa.cfg/php/enduser/doc_serve.php?2=subscriptionpage.

Enclosed you will find a copy of the checklists completed during the inspection. You can find copies of the rules and other information on the Division of Hazardous Waste's web page at <http://www.epa.state.oh.us/dhwm>.

Should you have any questions or require additional information, please contact Frank Popotnik, my supervisor, or me at (330) 963-1200.
