RE: MARTIN PULTRUSION GROUP
COMPLAINT #7119
CESQG CEI NOV

Jeff Martin, President
Martin Pultrusion Group
615 Golden Oak Parkway
Oakwood Village, OH 44146

Dear Mr. Martin:

On June 4, 2008, I met with you and Tom Gilmer, the plant manager, to investigate a complaint our office received concerning hazardous waste management at your facility. I conducted a conditionally exempt small quantity generator hazardous waste compliance inspection and was unable to substantiate the complaint. However, the following violations of hazardous waste rules, as found in the Ohio Administrative Code (OAC) Chapter 3745, were noted.

1. OAC 3745-273-13(D)(1) – Universal Waste Lamp Containers

Universal waste lamps are required to be stored in closed containers. Your facility was storing one box of spent 8 foot fluorescent lamps open.

Please confirm in writing that the box has been closed and indicate how you will ensure that universal waste lamp boxes will be kept closed in the future.

2. OAC 3745-273-14(E) – Universal Waste Lamp Labels

Universal waste lamp containers are required to be stored in containers labeled with the words 'Universal Waste – Lamps', 'Waste Lamps', or 'Used Lamps'. Your facility was storing one box of spent 8 foot fluorescent lamps in an unlabeled box.

Please confirm in writing that the box has been labeled and indicate how you will ensure that universal waste lamps will be stored in labeled boxes in the future.

3. OAC 3745-273-16 – Universal Waste Training

It appears employees who have responsibility for managing the universal waste lamps have not been informed on their proper management, including labeling and closure of containers.

Please describe what has been done to address this lack of training.

4. OAC 3745-279-22(C) – Used Oil Label

Containers of used oil are required to be clearly labeled with the words 'used oil'. Your facility had one unlabeled container of used oil. The correct labeling was added during the inspection. No further action is required at this time to abate this violation.

Please immediately address the first three violations and submit the requested documentation to this office within 30 days of the date of this letter. A copy of the checklists completed for this inspection is enclosed. The rules cited above and other helpful information can be found on our web page at www.epa.state.oh.us/dhwm.

I provided you with some literature on fluorescent lamp management during my inspection. One of your operators was interested in information related to the categories of hazardous waste generators and the requirements that apply to each. We have a very good generator handbook that addresses this topic. The handbook can be obtained at:

http://www.epa.state.oh.us/dhwm/pdf/gen_handbook.pdf. Please see Chapters 2 & 3 in particular.

We understand your company has already taken steps to recycle and reduce wastes. Your waste acetone, styrene, paint, thinners, and used oil are being sent to a recycler. Your used rags are sent for cleaning and reuse. Additional pollution prevention information can be found at www.epa.state.oh.us/opp. Also the Division of Hazardous Waste Management has created an electronic news service to provide timely updates on rule changes and other news related to hazardous waste in Ohio. We encourage you to sign-up for this free service at <http://www.epa.state.oh.us/dhwm/listserv.html>.

If you should have any questions concerning this letter please call me at (330) 963-1226.

Sincerely,

Sheryl K. Slone, P.E.
Environmental Engineer

Waste Codes for Federally Regulated Hazardous Wastes. Please list the codes for the federally regulated hazardous waste handled at the site. List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page if more space is needed. If there are more than 7 waste codes and they are the same as listed in the most recent RCRAInfo source record, you do not need to list them all. Instead just indicate the date of the most recent source record.
