Dear Mr. Erdman:

On August 5, 2010, I received the Mill-Rose Company's response to Ohio EPA's July 9, 2010 Notice of Violation letter. Documentation submitted included the weekly container inspection log, a photograph showing the phone number for the emergency coordinator and fire department posed next to the shipping phone, and monthly inspection forms for the fire extinguishers.

Based upon my review of the submitted documentation, the remaining violations noted in the July 9, 2010 Notice of Violation have been abated:

- 1. Ohio Administrative Code (OAC) 3745-279-22(C)(1); Containers and above ground tanks that are used to store used oil must be labeled with the words, "Used Oil".** This was previously abated.
- 2. OAC 3745-65-33; Testing and maintenance of equipment. Emergency equipment must be tested (inspected) as necessary and the inspections must be recorded in a log.** This violation has been abated.
- 3. OAC 3745-52-34(D)(4); Container management. Containers must be labeled with the words "Hazardous Waste".** This violation was previously abated.
- 4. OAC 3745-52-34(D)(4); Container management. Containers must have the accumulation start date on them.** This violation has been abated.
- 5. OAC 3745-66-74; Container Inspections. Containers holding hazardous waste must be inspected weekly.** This violation has been abated.
