**RE: PMC, Inc. OHD004207387, LAKE COUNTY, RCRA/LQG
NOTICE OF VIOLATION/ PARTIAL RETURN TO COMPLIANCE**

On June 9, 2011, Ohio EPA Division of Materials and Waste Management (DMWM) conducted a compliance evaluation inspection at the PMC, Inc. (PMC) facility in Wickliffe, Ohio. PMC is a manufacturer of pipe threading equipment for the oil and gas industry, and qualifies as a Large Quantity Generator (LQG) of hazardous waste. Hazardous waste streams generated at the facility include ignitable waste (D001, F003).

The purpose of this inspection was to determine PMC's compliance with Ohio's hazardous waste laws and regulations as found under the Ohio Revised Code and Ohio Administrative Code ("ORC" and "OAC," respectively). PMC was represented by you while Ohio EPA was represented by me. Ohio EPA's inspection included an inspection of the facility and a review of written documentation.

Based on this inspection, Ohio EPA has determined that PMC has violated the following state hazardous waste regulations:

1. **OAC Rule 3745-279-22 (C) Used oil storage requirements for generators:
Labels:**

Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil."

PMC collects spent coolants, used oil and 142 solvent (flashes at 142 degrees) in an above ground storage tank (AST). At the time of this inspection, the AST was not labeled with the words "Used Oil."

Upon being informed of this violation, PMC immediately labeled the tank of used oil with the words "Used Oil." Ohio EPA therefore considers this violation abated.

2. **OAC Rule 3745-279-22 (C) Used oil storage requirements for generators:
Labels:**

Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil."

At the time of this inspection, Ohio EPA observed one container of used oil labeled as Waste Oil. Upon being informed of this violation, PMC Immediately labeled the container of used oil with the words "Used Oil." Ohio EPA therefore considers this violation abated.

3. **OAC Rule 3745-52-34 (C)(1) Satellite accumulation of hazardous waste:**

A generator may accumulate as much as fifty-five gallons of hazardous waste or one quart of acutely hazardous waste listed in paragraph (E) of rule 3745-51-33 of the Administrative Code in containers at or near any point of generation where wastes initially accumulate, which is under the control of the operator of the process generating the waste, without a permit and without complying with paragraph (A) of this rule provided he:

(a) Complies with rules 3745-66-71, 3745-66-72, and paragraph (A) of rule 3745-66-73 of the Administrative Code; and:

(b) Marks his containers either with the words "Hazardous Waste" or with other words that identify the contents of the containers.

At the time of this inspection, Ohio EPA observed an open, unlabeled satellite accumulation container of Barium Salts in the heat treating area.

By e-mail dated June 27, 2011, Ohio EPA received photographic documentation demonstrating that the container of barium salts has been closed and labeled. Ohio EPA therefore considers this violation abated.

4. **OAC Rule 3745-52-34 (C)(1)(a) Satellite accumulation of hazardous waste:**

A generator may accumulate as much as fifty-five gallons of hazardous waste or one quart of acutely hazardous waste listed in paragraph (E) of rule 3745-51-33 of the Administrative Code in containers at or near any point of generation where wastes initially accumulate, which is under the control of the operator of the process generating the waste, without a permit and without complying with paragraph (A) of this rule provided he:

(a) Complies with rules 3745-66-71, 3745-66-72, and paragraph (A) of rule 3745-66-73 of the Administrative Code.

At the time of this inspection, Ohio EPA observed one open container of spent paint in the "Oil Room."

Upon being informed of this violation, PMC immediately closed the container. Ohio EPA therefore considers this violation abated.

5. OAC Rule 3745-65-32 (C) Required equipment:

All facilities shall be equipped with the following, unless none of the hazards posed by waste handled at the facility could require a particular kind of equipment specified below:

(C) Portable fire extinguishers, fire control equipment (including, but not limited to, special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment;

At the time of this inspection, PMC did not have the required emergency equipment available at the site of hazardous waste operations.

By e-mail dated June 28, 2011, Ohio EPA received photographic documentation that spill control equipment has been added to the hazardous waste accumulation area. Ohio EPA therefore considers this violation abated.

6. OAC Rule 3745-273-16 Employee training for small quantity handlers of universal waste:

A small quantity handler of universal waste shall inform all employees who handle or have responsibility for managing universal waste. The information shall describe proper handling and emergency procedures appropriate to the type(s) of universal waste handled at the facility.

At the time of this inspection, PMC had not trained employees in the proper management of universal waste lamps.

By e-mail dated June 28, 2011, Ohio EPA received training documentation for employees involved in universal waste management. Ohio EPA therefore considers this violation abated.

7. **OAC Rule 3745-273-15 Accumulation time limits- standards for small quantity handlers of universal waste:**

A small quantity handler of universal waste who accumulates universal waste shall be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste or is received. The handler may make this demonstration by:

- (1) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received;*
- (2) Marking or labeling each individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste or was received;*
- (3) Maintaining an inventory system on-site that identifies the date each universal waste became a waste or was received;*
- (4) Maintaining an inventory system on-site that identifies the earliest date that any universal waste in a group of universal waste items or a group of containers of universal waste became a waste or was received;*
- (5) Placing the universal waste in a specific accumulation area and identifying the earliest date that any universal waste in the area became a waste or was received; or*
- (6) Any other method which clearly demonstrates the length of time that the universal waste has been accumulated from the date it becomes a waste or is received.*

At the time of this inspection, PMC did not have a system to demonstrate how long universal waste had been on site.

Upon being informed of this violation, PMC marked the containers of lamps with the date of the oldest lamp in the box.

Ohio EPA therefore considers this violation abated.

8. **OAC Rule 3745-65-16 (A) Personnel training:**

- (1) Facility personnel must successfully complete a program of classroom instruction or on-the-job training that teaches them to perform their duties in a*

way that ensures the facility's compliance with the requirements of Chapters 3745-65 to 3745-69 and 3745-256 of the Administrative Code. The owner or operator must ensure that this program includes all the elements described in the document required under paragraph (D)(3) of this rule.

(2) This program must be directed by a person trained in hazardous waste management procedures, and must include instruction which teaches facility personnel hazardous waste management procedures, including contingency plan implementation, relevant to the positions in which they are employed.

(3) At a minimum, the training program must be designed to ensure that facility personnel are able to respond effectively to emergencies by familiarizing them with emergency procedures, emergency equipment, and emergency systems, including, where applicable;

At the time of this inspection, PMC did not have a personnel training program in place to train employees to properly manage Hazardous Waste in accordance with the Ohio Administrative Code.

By e-mail dated July 1, 2011, PMC stated the training will occur on the week of July 18, 2011. Please make sure that you include training on the updated contingency plan. Once complete, please submit the training sign in sheets, including information regarding the Trainer, to this office. Please make sure employees print and sign their names.

9. OAC Rule 3745-65-52 (D)(E) Content of contingency plan:

(D) The plan must list names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator (see rule 3745-65-55 of the Administrative Code), and this list must be kept up to date. Where more than one person is listed, one must be named as primary emergency coordinator and others must be listed in the order in which they will assume responsibility as alternates.

(E) The contingency plan must include a list of all emergency equipment at the facility [such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment], where this equipment is required. This list must be kept up to date. In addition, the contingency plan must include the location and a physical description of each item on the list, and a brief outline of its capabilities.

At the time of this inspection, PMC did not have a list of emergency coordinators in the facility contingency plan that included their home addresses.

By e-mail dated July 7, 2011, Ohio EPA received updated pages of the contingency plan which included the emergency coordinators home addresses.

10. OAC Rule 3745-65-16 (D) Job titles and descriptions:

(D) The owner or operator must maintain the following documents and records at the facility:

(1) The job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job;

(2) A written job description for each position listed under paragraph (D)(1) of this rule. This description may be consistent in its degree of specificity with descriptions for other similar positions in the same company location or bargaining unit, but must include the requisite skill, education, or other qualifications, and duties of facility personnel assigned to each position;

(3) A written description of the type and amount of both introductory and continuing training that will be given to each person filling a position listed under paragraph (D)(1) of this rule; and

(4) Records that document that the training or job experience required under paragraphs (A), (B), and (C) of this rule has been given to, and completed by, facility personnel.

At the time of this inspection, PMC did not have job titles and descriptions for those positions that manage hazardous waste.

By e-mail dated July-11-2011, Ohio EPA received job titles and descriptions for each position which is involved with hazardous waste management. Ohio EPA therefore considers this violation abated.

Please submit all requested documentation to this office within thirty (30) days of receiving this letter

GENERATOR LDR REQUIREMENTS

NOTE: This LDR checklist does not include the requirements for generators that treat to meet LDR standards. If the generator treats, the inspector should use the stand-alone Generator LDR checklist instead of this checklist.

GENERAL REQUIREMENTS

1.	If LDRs do not apply, does the generator have a statement that lists how the HW was generated, why LDRs don't apply and where the HW went? [3745-270-07(A)(7)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
2.	Did the generator determine if the HW/soil must be treated to meet the LDR treatment standard prior to disposal? Generator knowledge or testing may be used. [3745-270-07(A)(1)] If not,	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>

NOTE: This is done by determining if the HW /soil contains levels of constituents greater than the levels given in its LDR treatment standard in 3745-270-40. However, if a specific treatment method is given in 3745-270-40 for the HW, no determination is required [3745-270-07(A)(1)(b)]. If soil, generator can choose to have soil treated to LDR levels given in 3745-270-49 (alternative treatment levels for soils).

GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at: https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/SearchByCounty.asp.
