Rob Gustafon
R&M Fluid Power, Inc.
7953 Southern Blvd.
Youngstown, OH 44512

Dear Mr. Gustafon:

On November 3, 2009, this writer, representing the Ohio Environmental Protection Agency (Ohio EPA), Division of Hazardous Waste Management, conducted a compliance evaluation inspection (CEI) at R&M Fluid Power, Inc. located at 7953 Southern Boulevard, Youngstown, Ohio. The facility was inspected to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC), and the rules promulgated thereunder in Chapter 3745 of the Ohio Administrative Code (OAC).

The inspection included a review of the facility's operations, management of wastes, and records. The facility was inspected for the requirements of a conditionally exempt small quantity generator (CESQG) of hazardous waste.

Ohio EPA identified the following violations of Ohio's hazardous waste laws:

1. Used Oil Labeling, OAC rule 3745-279-22(C)(1):
Containers used to store used oil at generator facilities must be labeled or clearly marked with the words "used oil."

The facility failed to label two, 225-gallon tanks containing used oil.

This violation was abated during the inspection by labeling the tanks and no further response is required.

2. Universal Waste Lamps, OAC rule 3745-273-14(E):
Each lamp, or a container or package in which lamps are contained, must be labeled or marked clearly with any one of the following phrases: universal waste lamps, waste lamps, or used lamps.

The facility failed to label approximately 150 spent fluorescent lamps or their containers.

In order to abate this violation, facility must contain and properly label the lamps, and submit documentation demonstrating the lamps were sent off-site for recycling.

3. Universal Waste Lamps, OAC rule 3745-273-13(D)(1) and (2):

A small quantity handler of universal waste must contain any lamp in containers or packages that are structurally sound, adequate to prevent breakage, and compatible with the contents of the lamps. Such containers and packages must remain closed and must lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions. A small quantity handler of universal waste must immediately clean up and place in a container any lamp that is broken and must place in a container any lamp that shows evidence of breakage, leakage, or damage that could cause the release of mercury or other hazardous constituents to the environment. Containers must be closed, structurally sound, compatible with the contents of the lamps, and must lack evidence of leakage, spillage, or damage that could cause leakage or releases of mercury or other hazardous constituents to the environment under reasonably foreseeable conditions.

The facility failed to contain approximately 150 spent fluorescent lamps.

In order to abate this violation, facility must contain the lamps and submit documentation demonstrating the lamps were sent off-site for recycling

4. Universal Waste Accumulation, OAC rule 3745-273-15(A) and (C):

A small quantity handler of universal waste may accumulate universal waste for no longer than one year from the date the universal waste is generated, unless the requirements of paragraph (B) of this rule are met.

The facility accumulated its universal waste lamps for longer than year. The last shipment of universal waste batteries was in September 2006.

A small quantity handler of universal waste who accumulates universal waste shall be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste. This demonstration may be made by methods listed in OAC rule 3745-273-15(C)(1) to (6).

The facility failed to demonstrate the length of time the approximately 150 spent fluorescent lamps accumulated on-site.

In order to abate these violations, the facility must submit documentation demonstrating the lamps were sent off-site for recycling. A partial list of lamp recyclers in Ohio is enclosed (your current waste broker may also be able to accept the spent lamps).

Comments:

5. Please review, sign and submit the enclosed updated *RCRA Subtitle C Site Identification* form to update the facility's information. Mail the completed form to: Ohio EPA-DHWM, P.O. Box 1049, Columbus, Ohio, 43216-1049.

6. The facility may want to consider reviewing and updating its waste evaluation of the abrasive saw waste and honing machine waste. These waste streams are currently characterized as D007 (Chromium) waste. Enclosed is a list of environmental laboratories that may be able to help you analyze your waste.
7. The following technical assistance documents were provided to you during the inspection:
 - Hazardous Waste Satellite Accumulation Requirements;
 - Universal Waste Rules for Handlers of Lamps;
 - Identifying Your Hazardous Waste;
 - Regulation of Used Oil;
 - CESQG and SQG checklists; and
 - OCAPP Compliance assistance and pollution prevention brochure.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at: https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/SearchByCounty.asp.
