RE: **SENECA TAPE & LABEL, INC.**
CUYAHOGA COUNTY

CESQG NOV

Mr. John Hoopingarner
Seneca Tape & Label, Inc.
13821 Progress Parkway
Cleveland, Ohio 44133

Dear Mr. Hoopingarner:

Thank you for accompanying me during Ohio EPA's February 3, 2010, compliance inspection of Seneca Tape & Label, Inc. (Seneca) at 13821 Progress Parkway, Cleveland, Ohio. I inspected Seneca to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Seneca was represented by yourself and Mr. Robert Dusek. The facility is a printer of custom paper labels.

Seneca generates spent solvent and waste ink (D001) hazardous waste from cleanup activities at the printing line using solvent based ink. The cleaning solvent and waste ink is accumulated in a 55 gallon drum stored in the hazardous material storage room. It is picked up and managed by Chemical Solvents, Inc., of Cleveland. Based upon our discussion and my review of the hazardous waste manifests, the facility is a conditionally exempt small quantity generator of hazardous waste. One satellite accumulation drum (not yet full) was being accumulated on-site at the time of the inspection. During my investigation, I also inspected Seneca for compliance with Ohio's used oil and universal waste rules.

Seneca was found to be in violation of the following hazardous waste and used oil regulations found in Chapter 3745 of the Ohio Administrative Code. In order to correct these violations you must do the following and send me the required information **within 30 days** of your receipt of this letter:

- 1. Waste Evaluation, OAC 3745-52-11:** Any person who generates a waste must evaluate the waste to determine if the waste is a hazardous waste in accordance with the criteria set forth in OAC Chapter 3745-51. Seneca violated this regulation by disposing of waste lamps (including fluorescent lamps) as solid waste without determining whether or not the lamps were a hazardous waste. Fluorescent and some other types of lamps contain mercury and may contain other hazardous metals. Waste lamps may therefore be a hazardous waste. As an alternative to determining whether your particular waste lamps are hazardous waste, you may wish to manage them as Universal Waste. In general, this would involve saving the

waste lamps in a properly labeled and closed container (such as a cardboard box) and having them recycled by a lamp recycler.

To abate this violation, submit documentation indicating how Seneca will manage the waste lamps in compliance with Ohio's hazardous and/or universal waste regulations.

2. Used Oil Storage Requirements for Generators (Labels)

OAC 3745-279-22(C): *Containers and above ground tanks used to store used oil at generator facilities shall be labeled or marked clearly with the words "Used Oil".*

A drum located behind the Aquaflex, used to collect used oil, was not labeled per this rule. This violation was corrected at the time of the inspection when you applied a "Used Oil" label to the container. No further action regarding this violation is required.

Enclosed you will find a copy of the checklists that I completed as a result of the inspection. Should you have any questions, please feel free to call me at (330) 963-1231. You can find copies of the rules and other information on the division's web page at: <http://www.epa.state.oh.us/dhwm/>.

Sincerely,

Tom Roth
