RE: SPECTRUM METAL FINISHING, INC.
LARGE QUANTITY GENERATOR
OHD 004 229 506
MAHONING COUNTY
NOV

Mr. Dave McCleery
Manager
Spectrum Metal Finishing, Inc.
535 Bev Road
Youngstown, OH 44512-6490

Dear Mr. McCleery:

On October 6, 2009, Sherry Slone and I, representing the Ohio Environmental Protection Agency (Ohio EPA), Division of Hazardous Waste Management, conducted a compliance evaluation inspection (CEI) at Spectrum Metal Finishing's (Spectrum) facility located in Youngstown, Ohio.

Spectrum was inspected to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC), and the rules promulgated thereunder in Chapter 3745 of the Ohio Administrative Code (OAC). You represented Spectrum during the CEI.

The inspection included a review of the facility's operations, management of wastes, and a review of records. Spectrum was inspected for the requirements of a large quantity generator (LQG) of hazardous waste.

Ohio EPA identified the following violations of Ohio's hazardous waste laws. In order to correct the violations and concerns listed below, Spectrum must do the following and send me the requested information **within 30 days** of the date of this letter:

1. Manifest, OAC rule 3745-52-42(A)(1):
A generator who does not receive a copy of the manifest with the handwritten signature of the owner/operator of the designated facility within 35 days of the date the waste was accepted by the initial transporter shall contact the transporter and/or the owner/operator of the designated facility to determine the status of the waste.

The facility failed to determine the status of hazardous waste manifest #003157946 dated December 4, 2007.

In order to abate this violation, the facility must determine the status of the waste and submit a copy of the manifest to Ohio EPA.

2. Personnel Training, OAC rule 3745-65-16D(1) and (2):

The facility must maintain the following documents and records at the facility: (1) job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; and (2) a written description for each person listed.

The facility failed to have job titles and descriptions related to hazardous waste management for Tim Rowe and Greg Sheets.

In order to abate this violation, the facility must submit job titles and descriptions related to hazardous waste management for these employees.

3. Maintenance and Operation of Facility, OAC rule 3745-65-31:

Facilities shall be maintained and operated to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste.

The facility failed to minimize the possibility of a release of hazardous waste at the paint rack burn-off oven and wash-off area. Hazardous waste (D006 and D007) was accumulating in both areas.

In order to abate this violation, the facility must cleanup and properly manage the hazardous waste from both areas and submit photographs demonstrating the areas are clean.

4. Satellite Accumulation, OAC rule 3745-52-34(C)(1)(b):

Hazardous waste satellite accumulation containers must be marked with either the words "hazardous waste" or other words that identify the contents of the containers.

The facility failed to label or mark the following hazardous waste satellite accumulation containers at the Liquid Paint Line:

- (a) 5-gallon pail of waste solvent and 5-gallon pail of paint waste at the Primer Booth;
- (b) 5-gallon pail of waste solvent and 5-gallon pail of paint waste at the Hand Booths; and
- (c) 5-gallon pail of waste solvent and 5-gallon pail of paint waste at the Auto-Bell Booths.

In order to abate these violations, the facility must submit photographs demonstrating the containers are labeled.

5. Open Container, OAC rules 3745-52-34(C)(1)(a); 3745-66-73(A)

A container holding hazardous waste shall always be closed during storage, except when it is necessary to add or remove waste.

The facility failed to keep the following hazardous waste containers closed:

- (a) 5-gallon pail of waste solvent at the Primer Booth;

- (b) 5-gallon pail of waste solvent at the Hand Booths;

In order to abate these violations, the facility must submit photographs demonstrating the containers are closed.

6. Labeling, OAC rule 3745-52-34(A)(3):

While being accumulated on-site, each container must be labeled or marked clearly with the words "hazardous waste."

The facility failed to label the hazardous waste tote located in the paint kitchen.

In order to abate this violation, the facility must submit a photograph demonstrating the container is labeled as "hazardous waste."

7. Accumulation Date, OAC rule 3745-52-34(A)(2):

The date upon which each period of accumulation begins must be clearly marked and visible for inspection on each container.

The facility failed to place the accumulation date on the following containers of hazardous waste:

- (a) Gaylord box of F019 hazardous waste at the filter press; and
- (b) Tote of hazardous waste solvent at the paint kitchen.

In order to abate these violations, the facility must submit photographs demonstrating the containers are dated.

8. Weekly Inspections, OAC rule 3745-66-74:

The facility must inspect areas where containers are stored, at least weekly, looking for leaks and for deterioration caused by corrosion or other factors. These inspections must be recorded in a log or summary.

The facility failed to conduct and record weekly inspections at the following hazardous waste accumulation areas:

- (a) Filter Press; and
- (b) Paint Kitchen.

In order to abate these violations, the facility must submit a completed inspection log for each area.

9. Emergency Equipment, OAC rule 3745-65-33:

All facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment, where required, must be tested and maintained as necessary to assure its proper operation in time of emergency. The facility must record the inspections in a log or summary.

The facility failed to conduct and record emergency equipment inspections at the following hazardous waste accumulation areas:

- (a) Filter Press; and
- (b) Paint Kitchen.

In order to abate these violations, the facility must submit a completed inspection log for each area.

10. Universal Waste Lamps, OAC rule 3745-273-14(E):
Each lamp, or a container or package in which lamps are contained, must be labeled or marked clearly with any one of the following phrases: universal waste lamps, waste lamps, or used lamps.

The facility failed to label one box of universal waste lamps.

In order to abate this violation, the facility must submit a photograph demonstrating the box has been labeled.

Concerns:

- 11. The facility places spent booth filters and empty paint cans in the trash compactor rolloff box. This waste stream is managed as a solid waste and disposed at a local landfill. During the CEI, paint splatter was noted on the compactor unit. The facility must ensure that containers are empty prior to being placed into the rolloff box (a copy of OAC rule 3745-51-07 was provided during the inspection). In addition, the facility should continue to regularly test its spent paint booth filters to ensure the waste stream remains a non-hazardous waste.
- 12. A small quantity handler of universal waste who accumulates universal waste lamps must be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste. This demonstration may be made by methods listed in OAC rule 3745-273-15(C)(1) to (6). The facility may date each box of universal waste to comply with this requirement. No violation was cited since the facility had a record demonstrating universal waste lamps were last sent off-site on April 29, 2009.
- 13. Please submit a copy of the waste characterization and LDR form for the new purge solvent being used at the facility.
- 14. The facility was using a 500-gallon tote to collect hazardous waste purge solvent. The tote was located in the paint kitchen. During the inspection it was estimated that the tote contained approximately 345-gallons of spent solvent. Facility records indicate the spent solvent was last sent off-site for disposal on June 24, 2009. Ohio EPA is concerned that the 90-day hazardous waste accumulation limit may have been exceeded.

SPECTRUM METAL FINISHING, INC.
OCTOBER 21, 2009
PAGE – 5 –

Please explain and indicate how long the spent solvent (since exceeding 55-gallons) has been accumulating on-site, and submit a copy of a hazardous waste manifest demonstrating the spent solvent tote has been sent off-site for disposal.

15. Please explain the manifest discrepancy noted on November 16, 2007 shipment of hazardous waste to Chemical Solvents.

NOTE: This is done by determining if the HW /soil contains levels of constituents greater than the levels given in its LDR treatment standard in 3745-270-40. However, if a specific treatment method is given in 3745-270-40 for the HW, no determination is required [3745-270-07 (A)(1)(b)]. If soil, generator can choose to have soil treated to LDR levels given in 3745-270-49 (alternative treatment levels for soils).

|----|---|--|

NOTE: This is done by evaluating which underlying hazardous constituents (UHC) are in the HW at levels above the universal treatment standards given in 3745-270-48. This requirement does not apply to high total organic carbon (i.e., contains >10% TOC) D001 wastes or listed HWs.
