**RE: SUGAR RIDGE, INC., RESOURCE CONSERVATION & RECOVERY ACT (RCRA)
COMPLAINT INVESTIGATION #7307, NOTICE OF VIOLATION (NOV) AND
RETURN TO COMPLIANCE (RTC), LORAIN COUNTY**

Dear Mr. Nowak:

On April 19, 2010, this writer and Sherry Slone, representing Ohio EPA's Division of Hazardous Waste Management (DHWM), visited Sugar Ridge, Inc. (SRI) located at 41820-50 Oberlin-Elyria Road, Elyria, Ohio. The visit was in response to a complaint received by Ohio EPA alleging mismanagement of used oil. You and Matt Bartlome represented SRI.

The following represents Ohio EPA's findings:

Ohio EPA understands that SRI is a vehicle salvage and recycling facility. We understand that the vehicle dismantling process occurs inside a building on a concrete floor. During the salvage process used oil, antifreeze coolant, gasoline and diesel fuel, batteries, tires and scrap metal are generated. The used oil is collected into containers and transferred to one of two used oil tanks. Used oil is transported offsite by Akron Canton Waste Oil. Used and spent batteries are collected in a plastic tote. The batteries go offsite to a local battery shop where the batteries are evaluated, reconditioned and resold. Gasoline is collected and stored in a tank within secondary containment which is located in a separate storage unit. The gasoline and antifreeze coolant are used onsite. Used tires of good quality are sold through other outlets. Mercury switches, when present, in the vehicles are collected. Scrap tires are placed in the vehicles which are currently crushed offsite and recycled off site for their metal value. Spent fluorescent lamps are recycled to the local Lorain County Solid Waste Management District when generated.

Enclosed are the Used Oil Generator Checklist and Small Quantity Handler Universal Waste Checklist for spent lamps.

SRI failed to manage used oil spills onsite appropriately as required by the Ohio Administrative Code (OAC) 3745-279-22 (D) (1) (2) (3). A generator is required to stop the release; contain the release; and clean up and manage properly the released used oil and other materials.

On April 29, 2010, Ohio EPA received by e-mail photos showing that the areas of concern regarding used oil spills were visually clean. It appears that SRI has abated the violation.

Other items of concern noted during the site tour, such as the solid waste debris, are being forwarded to our Division of Solid and Infectious Waste Management (DSIWM) for their follow-up. Matt Bartlome's April 29 e-mail with photos showing clean up of these areas of concern will also be forwarded to the appropriate DSIWM personnel.

The representatives from Ohio EPA, Northeast District Office, who visited your facility prior to our visit, will also receive a copy of this letter.

If you have any questions, please call me at (330) 963-1255. A response to this letter is not required. Thank you for your cooperation in this matter.

The following technical guidance information is being provided to you:

- The April 2006, DHWM Guidance Document, "The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil"; and
- The June 2005, DHWM Guidance Document, "Universal Waste Rules for Handlers of Lamps".

On April 21, 2010, I e-mailed you information on a Compliance Assistance Conference that was being held at Ohio EPA's headquarters in Columbus. I hope you or someone from your organization was able to attend.

Failure to list specific deficiencies in this communication does not relieve SRI from the responsibility of complying with all applicable hazardous waste regulations. This letter does not relieve your facility from liability for any past or present violations of the state's hazardous waste laws.

Sincerely,

Kris Coder

Ohio EPA understands that salvaged vehicle batteries are collected in an open plastic tote stored inside the Process Building which is roofed and enclosed. Batteries received are shipped offsite, weekly, to a local battery shop where they are evaluated, reconditioned and resold.

Ohio EPA understands that when spent lamps are generated the lamps are recycled to the Lorain County Solid Waste Management District. Ohio EPA did not observe any accumulated spent lamps. Employee training requirements were not discussed at this time.
