**RE: THE SELINICK COMPANY
NON-GENERATOR
GEAUGA COUNTY
COMPLAINT #7391/NOV**

Mr. Merv Miller
The Selinick Company
15879 Madison Road
Middlefield, Ohio 44062

Dear Mr. Miller:

Thank you for accompanying me during Ohio EPA's March 18, 2011 complaint investigation of The Selinick Company in Middlefield, Ohio. The complaint concerned the possible mismanagement of used oil at the property. I also inspected Selinick to determine its compliance with Ohio's Used Oil rules found in Chapter 3745 of the Ohio Administrative Code (OAC).

I found the following violation of Ohio's used oil rules. In order to correct this violation you must do the following and send me the required information **within 30 days** of your receipt of this letter:

1. **OAC Rule 3745-279-22(B), Container/Tank Condition:** Containers and above ground tanks used to store used oil must be in good condition with no visible leaks.

During my inspection you indicated the drain valve on the used oil tank had a slow drip which was causing oil staining beneath and around the valve. You indicated this leak had recently begun when a new employee did not follow procedure and used this valve in lieu of siphoning the tank out from the top fill opening as had been standard practice. You also stated that the valve could no longer be closed completely and that a bucket used to catch the drip had been removed by an unknown employee. This malfunctioning valve is a violation of OAC 3745-279-22(B).

Selinick Company must immediately remove this tank from service and repair or replace this leaking valve before returning the tank to service. Indicate in your response what measures Selinick has taken to repair this leak.

2. **OAC Rule 3745-279-22(D), Release of Used Oil:** Upon detection of the release of used oil, you must stop the release, contain the release, clean up and properly manage the released used oil, and repair or replace the leaky tank.

Mr. Merv Miller
The Selinick Company

Selinick did not address the leaking used oil tank, as required, in violation of OAC 3745-279-22(D). In addition to the leaking tank, oil saturated soil/gravel was observed at the repair bay exit resulting from drag-out drippage of oil from vehicles exiting your used oil undercoating business.

To return to compliance with this rule, all soil and gravel visibly contaminated by used oil must be removed and replaced with clean materials. This material may be disposed of as solid waste as long as it does not contain free liquid. Indicate in your response what measures were taken to clean up this used oil and submit photographic evidence.

As I indicated during the inspection, best management practices should be used to prevent oil spillage or environmental contamination resulting from the undercoating service.

I have enclosed a copy of the used oil inspection checklist I completed during the inspection. You can find Ohio's hazardous waste and used oil rules, and other information, on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Should you have any questions, please feel free to call me at (330) 963-1231.

Sincerely,

Thomas Roth

GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at:
