Hazardous Waste
Notice of Violation

June 28, 2010

Mr. John Bridenbaugh
Defiance Metal Products
P.O. 447 - 21 Seneca
Defiance, Ohio 43512

Dear Mr. Bridenbaugh:

On June 10, 2010, Wendy Miller and I conducted a compliance evaluation inspection at Defiance Metal Products (DMP) located at 21 Seneca in Defiance, Ohio. We inspected DMP to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Pollution prevention options were also discussed during this inspection. This letter will explain the violations found and what you need to do to correct these violations.

During our visit, we toured your building, observed your operations, and reviewed paperwork. DMP is a metal stamping plant that makes parts for heavy trucks and equipment (i.e. International, Caterpillar). DMP generates waste paint solvent (D001) that is picked up approximately two times a year by PSC. Used oil is generated whenever stamping machine maintenance occurs and is stored in a tote. A non-hazardous oily mop water is the largest waste stream generated at DMP and is stored in a tank. This waste stream varies and can be at times as high as 50% oil. Cousins picks up the oily mop water and checks the pH of every shipment prior to taking it off-site for recycling.

DMP also generates spent fluorescent lamps and batteries which are managed as universal waste. At the time of our inspection, DMP was operating as a conditionally exempt small quantity generator (CESQG) of hazardous waste.

We found the following violations of Ohio's universal waste rules. In order to correct these violations you must do the following and send me the required information within 30 days of your receipt of this letter:

- OAC Rule 3745-273-14(E): Universal Waste: Fluorescent Lamp Labeling:** All packages and containers holding spent fluorescent lamps/bulbs are to be labeled with the words "Universal Waste - Lamps", "Waste Lamps" or "Used Lamps".

DMP did not have the boxes of spent fluorescent lamps properly labeled.

Mr. John Bridenbaugh

Page Two

DMP properly labeled the storage boxes with the words "Universal Waste - Lamps", at the time of our inspection.

Therefore, this violation is considered abated.

2. OAC Rule 3745-273-15(A): Accumulation Time for Universal Waste Batteries and Lamps:

A small quantity handler of universal waste may accumulate universal waste for no longer than one year from the date the universal waste is generated, or received from another handler.

DMP had one bucket of universal waste batteries that was labeled with the accumulation start date of 5/13/09.

In order to correct this violation, DMP must immediately ship off-site for recycling the spent batteries that have been in storage for greater than one year. DMP must submit a copy of the receipt for the shipment of spent batteries sent off-site for recycling.

3. OAC Rule 3745-273-16: Universal Waste Employee Training:

A small quantity handler of universal waste shall ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relative to their responsibilities during normal facility operations and emergencies.

DMP has not ensured that all employees are thoroughly familiar with proper waste handling and emergency procedures.

In order to correct this violation, DMP must describe, through a training outline, how it will thoroughly familiarize (train) its universal waste fluorescent bulb and universal waste battery handlers in proper handling and emergency procedures. DMP must submit some form of documentation demonstrating that this training has been accomplished (i.e. sign-in sheet, training memo). Copies of two universal waste guidance documents were given to you at the time of our inspection. Please review this information and contact me if you have any questions.

Ohio EPA has helpful information about compliance assistance and pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>. In addition, you can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Enclosed you will find a copy of the checklists that were completed during the inspection.
