Re: Marathon Service Center
Defiance County
Hazardous Waste
Notice of Violation

July 30, 2008

Mr. Ron Burk
531 East 2nd Street
Defiance, Ohio 43512

Dear Mr. Burk:

On July 10, 2008, Wendy Miller and I conducted a compliance evaluation inspection at Marathon Service Center (MSC) located at 310 Second Street in Defiance, Ohio. We inspected MSC to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Pollution prevention options were also discussed during this inspection. This letter will explain the violations we found and what you need to do to correct these violations.

During our visit, we spoke with Zac Schmunk, toured your facility and observed your operations. Your facility is a full-service vehicle maintenance shop. Oil changes, brake jobs, and engine repairs are some of the services provided. No painting is done at your facility and no solvents are generated. Used oil is stored in 55-gallon drums. MSC also generates spent fluorescent lamps. At the time of our inspection, MSC was operating as a non-generator of hazardous waste.

We found the following violations of Ohio's hazardous waste and used oil rules. In order to correct these violations you must do the following and send me the required information within 30 days of your receipt of this letter:

1. OAC Rule 3745-52-11: Waste Evaluation

Any person who generates a waste must determine if that waste is a hazardous waste by using generator knowledge or by testing the waste.

MSC failed to have waste evaluation documentation or an established recycling plan in place for the fluorescent bulbs generated at the facility.

Hazardous bulbs are considered "spent materials" and remain hazardous waste even when recycled. Hazardous waste lamp generators have the option of handling their lamps as hazardous waste or as universal waste. Managing hazardous waste lamps under the universal waste rules eases certain regulations imposed on generators of spent lamps.

Please be aware that incandescent, fluorescent, metal halide, neon, high-intensity discharge, high-pressure sodium and mercury-vapor lamps could be hazardous waste when discarded. Fluorescent lamps may contain up to 40 milligrams (mg) of mercury, depending on the brand and manufacturer. Lamps may also contain lead and cadmium. Many lamps exhibit a characteristic of toxicity for heavy metals when disposed. A copy of Fluorescent Lamps: What You Should Know, is enclosed. I recommend that you review this document and contact me if you have any questions.

MSC must submit to Ohio EPA documentation to demonstrate how you plan to properly manage your fluorescent bulbs. If MSC decides to conduct waste sampling, please notify me at least seven days prior to the sampling event date so that a representative from Ohio EPA can be present to observe the sampling and to split samples if necessary. If MSC plans to manage the spent fluorescent bulbs as universal waste, please submit photographic documentation showing the storage containers properly closed, labeled, and dated. MSC must also properly train employees, who handle or have responsibility for managing universal waste, on waste handling and emergency procedures relative to their responsibilities and send me documentation that this has been completed. In addition, MSC must submit the name of the facility where you plan to recycle the bulbs.

2. OAC Rule 3745-279-22(C)(1): Used Oil Generator Labeling

Containers, aboveground tanks, and fill pipes used for underground storage tanks shall be labeled or marked clearly with the words "used oil."

MSC had three 55-gallon drums of used oil located outside behind the building and two carboys located in the maintenance area that were not properly labeled.

MSC properly labeled the three drums and two carboys with the words "used oil" at the time of our inspection. A copy of the fact sheet, The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil, is enclosed. Please review this information and contact me if you have any questions.

Therefore, this violation is considered abated.

3. OAC Rule 3745-279-45(G): Used Oil Transfer Facility Labeling

Containers and aboveground tanks used to store used oil at transfer facilities must be labeled or marked clearly with the words "used oil."

MSC had three 55-gallon drums of used oil located outside behind the building and two carboys located in the maintenance area that were not properly labeled.

MSC properly labeled the three drums and two carboys with the words "used oil" at the time of our inspection.

Therefore, this violation is considered abated.

Mr. Ron Burk
July 30, 2008
Page Three

4. OAC Rule 3745-279-24(B)(2): Off-Site Shipments of used Oil by Generators

Generators may transport, without a U.S. EPA identification number, used oil that is generated at the generator's site to an aggregation point provided that the generator transports no more than fifty-five gallons of used oil at any time.

MSC has been transporting excess used oil generated at the facility to Exceptional Motorcar, Inc. (EMI), which is a business you currently own. According to Zac Schmunk, service manager at MSC, the drums of excess used oil are placed on a trailer and taken to EMI. More than 55 gallons of used oil are transported at a time to EMI.

MSC must cease transporting greater than 55 gallons of used oil at any time to EMI. To abate this violation, MSC must submit a copy of an internal policy outlining your used oil practices and procedures which must include the transportation of used oil from one business you own to another.

Ohio EPA will issue an EPA ID number to track our inspection activity. MSC cannot use this number for manifesting hazardous waste shipments. If MSC wants to use an EPA ID number for manifesting and other hazardous waste, used oil or universal waste activities, you must complete and submit a Notification of Regulated Waste Activity form (*EPA Form 9029 (Rev. 11/2002)*) to Ohio EPA. This form is available on our web page at <http://www.epa.state.oh.us/dhwm/notiform.html> or you can call me at (419)373-3066 or the Division of Hazardous Waste Management, Central Office, RIS at (614)644-2977 and we will mail you a copy.

Enclosed you will find a copy of the checklist that was completed during the inspection.

Ohio EPA has helpful information about compliance assistance and pollution prevention at <http://www.epa.state.oh.us/ocapp/ocapp.html>. In addition, you can also find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm>.

Should you have any questions or if I can be of assistance, please contact me at (419)373-3066.

Sincerely,

Melissa L. Boyers
Division of Hazardous Waste Management

PROCESS DESCRIPTION/WASTE ACTIVITIES SUMMARY

Facility Name: Marathon Service Station

Facility Type: LQG/SQG/CESQG/TSD

EPA ID#:

Description of Waste				On-Site Management			Off-Site Management
Process/Activity Generating Waste <small>(e.g. plating bath, machining, baghouse, painting, etc)</small>	Waste Generated <small>(e.g. sludge, spent solvent, ash, etc)</small>	EPA Waste Code	QTY Generated per Month	Type of Accumulation/Storage <small>(e.g. container, tank, etc)</small>	Type of On-Site Treatment <small>(recycle, wwt, etc)</small>	Waste Location <small>(Include map if possible)</small>	Name, state, and type of activity occurring at the facility.
1 Lighting	Spent Fluorescent Bulbs						Manage as solid waste
2 Vehicle Maintenance	Used Oil			55-gallon drums		Located outside, behind the building	Marathon burns used oil in an on-site burner. Excess used oil is taken to Exceptional Motorcar, Inc. to burn in their on-site burner. Both businesses are owned by Ron Burk

**USED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

PROHIBITIONS

1. Does the generator manage used oil in a surface impoundment or waste pile? If yes: Yes No N/A
- a. Is the surface impoundment or waste pile regulated as a hazardous waste management unit? [3745-279-12(A)] Yes No N/A
2. Is used oil used as a dust suppressant? [3745-279-12(B)] Yes No N/A
3. Is off-specification used oil fuel burned for energy recovery in devices specified in 3745-279-12(C)? Yes No N/A

NOTE: Multiple used oil checklists may be applicable if used oil handler is performing multiple tasks (e.g., If generating used oil and shipping directly to a burner, complete generator and marketer checklists at a minimum).

GENERATOR STANDARDS

4. Does the generator mix hazardous waste with used oil? If so, Yes No N/A
- a. Is the mixture managed as specified in 3745-279-10(B)? [3745-279-21(A)] Yes No N/A

NOTE: Used Oil mixed with listed (3745-51-30 to 3745-51-35) or characteristic (3745-51-20 to 3745-51-24) hazardous waste are subject to regulation as a hazardous waste, unless the listed hazardous waste is listed solely because it exhibits a hazardous characteristic, and the resultant mixtures do not exhibit a characteristic. Mixtures of used oil and CESQG hazardous waste are subject to OAC Chapter 3745-279.

5. Does the generator of a used oil containing greater than 1,000 ppm total halogens manage the used oil as a hazardous waste unless the presumption is rebutted successfully? [3745-279-21(B)] Yes No N/A

NOTE: If used oil contains greater than 1000 ppm total halogens, it is presumed to be listed hazardous waste until the presumption is successfully rebutted.

6. Does the generator store used oil in tanks; or containers; or a unit(s) subject to regulation as a hazardous waste management unit? [3745-279-22(A)] Yes No N/A
7. Are containers and aboveground tanks used to store used oil in good condition with no visible leaks? [3745-279-22(B)] Yes No N/A
8. Are containers, above ground tanks, and fill pipes used for underground tanks clearly labeled or marked "Used Oil?" [3745-279-22(C)] Yes No N/A

9. Has the generator, upon detection of a release of used oil, done the following: [3745-279-22(D)]
- a. Stopped the release? Yes No N/A
- b. Contained the release? Yes No N/A
- c. Cleaned up and properly managed the used oil and other materials? Yes No N/A
- d. Repaired or replaced the containers or tanks prior to returning them to service, if necessary? Yes No N/A

ON-SITE BURNING IN SPACE HEATER

10. Does the generator burn used oil in used-oil fired space heaters? [3745-279-23] If so: Yes No N/A
- a. Does the heater burn only used oil that owner/operator generates or used oil received from household do-it-yourself (DIY) used oil generators? Yes No N/A
- b. Is the heater designed to have a maximum capacity of not more than 0.5 million BTU per hour? Yes No N/A
- c. Are the combustion gases from heater vented to the ambient air? Yes No N/A

GENERATOR TRANSPORTATION

11. If the generator self-transport used oil to an approved collection site or to an aggregation point owned by the generator: [3745-279-24]
Used oil taken to Exceptional Motorcar to burn in their on-site burner.
- a. Does the generator transport used oil in a vehicle owned by the generator or an employee of the generator?[3745-279-24] Yes No N/A
- b. Does the generator transport more than 55 gallons of used oil at any time?[3745-279-24] Yes No N/A

NOTE: Used oil generators may arrange for used oil to be transported by a transporter without a U.S. EPA ID # if the used oil is reclaimed under a contractual agreement (i.e., tolling arrangement).

COLLECTION CENTERS AND AGGREGATION POINTS

12. Is the DIY used oil collection center in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-30] Yes No N/A
13. Is the non-DIY used oil collection center registered with Ohio EPA? [3745-279-31] Yes No N/A
14. Is the used oil aggregation point in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-32] Yes No N/A

NOTE: Complete Used Oil Generator and any other applicable used oil handler checklist (e.g., marketer, burner, etc.) for used oil collection centers and aggregation points.
