Mr. Ed Gerhart, Vice President
Sandusky Electric
1516 Milan Road
Sandusky, Ohio 44870

Dear Mr. Gerhart:

On Thursday, October 15, 2009, I inspected Sandusky Electric located at 1516 Milan Road in Sandusky, Ohio. I inspected Sandusky Electric to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). During the inspection I also helped Sandusky Electric identify ways to prevent pollution by reducing waste. My inspection included an inspection of company operations and a review of written documentation. Mr. Tim Stobie represented Sandusky Electric during the inspection.

Sandusky Electric is an electric motor sales and repair facility. The facility uses one parts washer in the repair shop for parts cleaning which generates approximately 30 gallons of (D001) ignitable hazardous waste every four months. Sandusky Electric also generates a small quantity of sand blasting media to clean used motors prior to painting. A small quantity of spent fluorescent lamps are generated at the facility which are sent off-site for recycling as universal waste. Sandusky Electric also generates a small quantity of scrap metal which is sent off-site for recycling.

Mr. Stobie and I could not identify any spent fluorescent lamps in storage at the facility at the time of the inspection. Please be advised that spent fluorescent lamps must be stored in a closed and labeled container. This container must be properly labeled with the wording "**Universal Waste Lamp(s)**", "**Waste Lamp(s)**", or "**Used Lamp(s)**". Sandusky Electric must also track the accumulation of the spent fluorescent lamps to ensure that they are not stored for greater than 365 days. This can be accomplished with recycling receipts or by marking the container with the accumulation start date (the day the first lamp is placed in the container).

Mr. Ed Gerhart

I have enclosed the following fact sheets on spent lamps: Universal Waste Rules for Handlers of Lamps, dated June 2005; Fluorescent Lamps: What You Should Know, dated January 2007; and Computer, Fluorescent Lamp and Ballast Recyclers, dated July 2009 for your use.

I found the following violation of Ohio's hazardous waste laws. In order to correct this violation you must do the following and send me the required information **within 45 days** of your receipt of this letter:

1. **OAC Rule 3745-52-11, Hazardous Waste Determination:** "Any person who generates a waste, as defined in rule 3745-51-02 of the Administrative Code, must determine if that waste is a hazardous waste..."

Sandusky Electric has failed to evaluate the spent sand blasting media used in the motor repair shop.

To abate this violation, Sandusky Electric must analyze a representative sample of the spent sand blasting media for RCRA metals using the toxicity characteristic leaching procedure (TCLP) as outlined in U.S. EPA's SW-846. This information should be submitted to my attention at the Ohio EPA within 45 days of receipt of this letter.

Enclosed you will find a copy of the checklists that I completed as a result of the inspection. Should you have any questions, please feel free to call me at (419-373-3056). You can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Sincerely,

Gary S. Deutschman

List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page if more space is needed. If there are more than 7 waste codes and they are the same as listed in the most recent RCRAInfo source record, you do not need to list them all.
