Hazardous Waste
Notice of Violation

April 12, 2010

Mr. Tom Childress, Owner
Childress Collision, LLC
909 Main Street
Delta, Ohio 43515

Dear Mr. Childress:

On March 25, 2010, Wendy Miller and I conducted a compliance evaluation inspection at Childress Collision, LLC (Childress) located at 909 Main Street in Delta, Ohio. We inspected Childress to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Pollution prevention options were also discussed during this inspection. This letter will explain the violations found and what you need to do to correct these violations.

During our visit we toured your building, observed your operations, and reviewed paperwork. Childress is a full service auto body repair shop. Childress generates waste paint solvent (D001, D035, F003, F005) that is picked up two times a year by Nortru and taken to Petrochem. No used oil is generated at your facility. Childress has one paint booth and the spent filters are managed as solid waste.

Childress also generates spent fluorescent lamps which are managed as universal waste. At the time of our inspection, Childress was operating as a conditionally exempt small quantity generator (CESQG) of hazardous waste. During our review of your paperwork, it was noted that Childress was using an incorrect hazardous waste identification number on past waste disposal manifests. Hazardous waste identification numbers are address specific and one was obtained by the previous owner/operator, Delta Collision. The number you were using was OHG000044686, which is not a US EPA ID number. OHG numbers are assigned by Michigan to generators who they think don't have an ID number. Ohio EPA recommends that Childress formally notify by completing and sending in the enclosed Site ID form.

If you have any questions while completing the enclosed form, please contact Kristina Dumell at 614-644-1694. Additional information about the notification form can also be found at the following web link: <http://epa.ohio.gov/dhwm/notiform.aspx>.

We found the following violations of Ohio's hazardous waste and universal waste rules. In order to correct these violations you must do the following and send me the required information within 30 days of your receipt of this letter:

1. Waste Evaluation, OAC Rule 3745-52-11:

Any person who generates a waste must determine if that waste is a hazardous waste by using generator knowledge or by testing the waste.

At the time of the inspection, Childress did not have waste evaluation documentation for the spent paint filters. Childress has historically disposed of this spent material as a non-hazardous waste. Childress must immediately cease disposing of the waste paint filters as non-hazardous waste until a proper waste evaluation has been completed.

Childress must obtain a representative sample of the spent paint booth filter waste stream and have it analyzed for Toxic Characteristic Leaching Procedure (TCLP) Resource Conservation and Recovery Act (RCRA) metals (SW-846 Method 1311/6010) and volatile organics (SW-846 Method 1311/8260). You must notify me at least seven days prior to the sampling event date so that a representative from Ohio EPA can be present to observe the sampling and to split samples if necessary. To abate this violation, Childress must submit a copy of the analytical results to Ohio EPA. Once analytical results have been reviewed, Ohio EPA will advise you on proper disposal options as well as plans for the future management of this waste stream.

Ohio EPA will review the submitted waste evaluation information and determine Childress' generator status. Additional violations may be cited based upon waste evaluation results or your determined generator status. You will be notified of any additional violations in a separate letter.

2. OAC Rule 3745-273-15(A): Accumulation Time for Universal Waste Batteries and Lamps:

A small quantity handler of universal waste may accumulate universal waste for no longer than one year from the date the universal waste is generated, or received from another handler.

Childress had one box of universal waste bulbs that was labeled with the accumulation start date of 3/3/05.

In order to correct this violation, Childress must immediately ship off-site for recycling the spent fluorescent bulbs that have been in storage for greater than one year. Childress must submit a copy of the receipt for the shipment of spent fluorescent bulbs sent off-site for recycling.

3. OAC Rule 3745-273-16: Universal Waste Employee Training:

A small quantity handler of universal waste shall ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relative to their responsibilities during normal facility operations and emergencies.

Childress has not ensured that all employees are thoroughly familiar with proper waste handling and emergency procedures.

In order to correct this violation, Childress must describe, through a training outline, how it will thoroughly familiarize (train) its universal waste fluorescent bulb handlers in proper handling and emergency procedures. DTC must submit some form of documentation demonstrating that this training has been accomplished (i.e. sign-in sheet, training memo). Copies of two universal waste guidance documents were given to you at the time of our inspection. Please review this information and contact me if you have any questions.

Ohio EPA has helpful information about compliance assistance and pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>. In addition, you can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Enclosed you will find a copy of the checklists that were completed during the inspection.

Should you have any questions or if I can be of assistance, please contact me at (419) 373-3066.

Sincerely,

Melissa L. Boyers
