Mr. Jeff Kunkel  
Fulton County Processing  
7800 State Route 109  
P. O. Box 67  
Delta, Ohio 43515

Dear Mr. Kunkel:

Thank you for accompanying Mark Barber and me during the Ohio Environmental Protection Agency's (Ohio EPA's) May 17, 2011, hazardous waste compliance evaluation inspection of Fulton County Processing (hereafter FCP) located in Delta, Ohio. I inspected FCP to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC), and Chapter 3745 of the Ohio Administrative Code. Pollution prevention options were also discussed during this inspection. This letter will explain the violations found and what you need to do to correct these violations.

FCP has been operating since July 2009. FCP operates three slitting lines and one pickling line which services the rolled steel industry.

Wastes generated include: used oil, universal waste lamps, and non-hazardous parts washer solvent. Additionally, FCP generates approximately 3,000-4,000 gallons per day of spent pickle liquor which is used as a substitute for a commercial chemical ingredient in wastewater treatment. PVS-Dynecol is the company being used for this.

The following violations of Ohio's hazardous waste and used oil rules were observed and noted during the inspection. In order to correct these violations you must do the following and send me the required information within 30 days of your receipt of this letter:

1. **Waste Evaluation, OAC Rule 3745-52-11:** Any person who generates a waste must determine if that waste is a hazardous waste by using generator knowledge or by testing the waste.

Mr. Jeff Kunkel  
June 1, 2011  
Page 2

At the time of the inspection, FCP did not have waste evaluation documentation for the filter paper used in the water recycle system. FCP has historically disposed of this spent material as a non-hazardous waste. FCP must immediately cease disposing of the filter paper as non-hazardous waste until a proper waste evaluation has been completed.

To abate this violation, FCP must obtain a representative sample of the filter paper and have it analyzed for Resource Conservation and Recovery Act (RCRA) TCLP metals using SW-846 method 1311. TCLP is an acronym for Toxicity Characteristic Leaching Procedure, which will simulate your waste in a landfill and will determine if it is considered hazardous or not. This will test for Arsenic, Barium, Cadmium, Chromium, Lead, Mercury, Selenium and Silver which may have come off of the steel. FCP must send a copy of the analytical results to me for review. This will determine how the waste must be managed in the future.

**2. Labeling of Used Oil, OAC 3745-279-22(C)(1):**

Generators must label or mark containers holding used oil with the words "Used Oil".

FCP had several containers labeled Waste Oil at the time of inspection. I advised you of the wording in the regulations and that they must be labeled "Used Oil".

**To abate this violation, you must label the containers with the words "Used Oil" and send me photographs or email documentation showing that this has been done.**

**On May 18, 2011, you submitted, via email, photographs of the totes properly labeled "Used Oil". Therefore, this violation is considered abated.**

During the inspection, I noted that you used disposable rags and gloves. You may want to consider a service to launder these types of materials.

At the time of our inspection, no universal waste lamps were in storage. They had been changed and picked up by MSC in the past. After our visit, you became aware that MSC no longer offers recycling services.

You contacted me and said that FCP will be utilizing Gross Electric in the future for recycling.

Mr. Jeff Kunkel  
June 1, 2011  
Page 3

I left you a fact sheet which describes how used/burned out lamps should be stored prior to recycling. If you have any questions, you can contact me. They basically need to be labeled, in a closed box and need to be recycled within a year.

Enclosed you will find a copy of the checklists that I completed during the inspection. You can find copies of the rules and other information on the division's web page at <http://www.epa.ohio.gov/dhwm>. Ohio EPA also has helpful information about pollution prevention at the following web address: <http://www.epa.ohio.gov/opp>.

Ohio EPA will issue an EPA ID number to track our inspection activity at FCP. FCP cannot use this number for manifesting hazardous waste shipments. If FCP wants to use an EPA ID number for manifesting and other hazardous waste, used oil or universal waste activities, FCP must complete and submit a Notification of Regulated Waste Activity form (*EPA Form 9029 (Rev. 11/2002)*) to Ohio EPA. This form is available on our Web page at <http://www.epa.ohio.gov/dhwm> or FCP can call the Division of Materials and Waste Management, Central Office at (614)644-2977 and we will mail you a copy.

The Division of Materials and Waste Management has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign-up for this free service. You can find more information at Web link <http://www.epa.ohio.gov/dhwm> (click on the link for DHWM Electronic Mailing List).

Should you have any questions or if I can be of assistance, please contact me at (419) 373-3114.

Sincerely,

Wendy Miller
