Mr. Jaimin Patel CEF
Sanoh America, Inc.
1849 Industrial Drive
P. O. Box 1626
Findlay, Ohio 45839-1626

Dear Mr. Patel:

On April 26, 2011, Wendy Miller and I inspected Sanoh America, Incorporated (Sanoh) located at 1849 Industrial Drive in Findlay, Ohio. The purpose of our visit was to determine Sanoh's compliance with Ohio's hazardous waste laws and regulations as adopted under Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). This letter will explain the violations we found, what you need to do to correct the violations, and also includes information on pollution prevention.

Sanoh manufactures brake lines and fuel lines for the automotive industry. Carbon steel tubing and copper coated carbon steel tubing is plated with zinc and painted or coated with poly vinyl and cut to length. The electroplating consists of zinc to carbon steel lines and zinc to copper plated carbon steel lines. Wastes generated at the facility include paint waste (D001, D007, D035, F003, F005), PPE/gloves (D007, D035, F003, F005), aerosol cans (D001, D035), waste MEK (D001, D035), Propane Cylinders (D001) and spent fluorescent lamps (managed as universal waste). Non-hazardous wastes generated include used oil, parts washer waste which is reused and RCRA empty PA Primer cans. Wastewater treatment sludge is also generated at the facility which is managed as non-hazardous waste.

The following violations of Ohio's hazardous waste laws were found during the April 26, 2011, inspection:

1) Causing hazardous waste to be transported to an unpermitted facility, ORC Section 3734-02(F):

OAC Rule 3745-51-31(A) defines (F006) hazardous waste as: Wastewater treatment sludges from electroplating operations except from the following processes: (1) sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum.

Sanoh's plating operation consists of zinc plating of carbon steel tubing and zinc plating on copper plated carbon steel tubing. Ohio EPA has determined that because the facility is zinc plating on copper plated carbon steel tubing, the resulting wastewater treatment sludge meets the definition of F006 hazardous waste. Therefore, Sanoh is in violation of ORC Section 3734-02(F) for transporting or causing to be transported approximately 60 tons of F006 wastewater treatment sludge (filtercake) each month as a solid waste to the Republic Environmental-owned, County Environmental Sanitary Landfill located at 11164 County Road #4, Carey Ohio, Wyandot County, 43316. During the inspection, you stated that Sanoh has been transporting the wastewater treatment sludge for several years.

To abate this violation, Sanoh must immediately begin managing the wastewater treatment sludge as F006 hazardous waste. The F006 hazardous waste wastewater treatment sludge must be transported using a licensed hazardous waste transporter to a permitted hazardous waste treatment, storage or disposal facility.

2) Waste Evaluation, OAC Rule 3745-52-11(B):

Any person who generates a waste, as defined in rule 3745-51-02 of the Administrative Code, must determine if that waste is a hazardous waste.

As stated in Violation #1 above, Sanoh failed to adequately evaluate the wastewater treatment sludge generated from the filter press associated with treatment of wastewater from the facility's zinc plating operation.

To abate this violation, Sanoh must immediately begin managing the wastewater treatment sludge filtercake as F006 hazardous waste.

3) Use of Hazardous Waste Manifest, OAC Rule 3745-52-20(A):

A generator who transports, or offers for transportation, hazardous waste for off-site disposal must prepare a uniform hazardous waste manifest before transporting the hazardous waste off-site.

As stated in Violation #1 above, Sanoh has shipped F006 hazardous waste wastewater treatment sludge to a licensed solid waste disposal facility. This facility is not permitted to accept hazardous waste.

To abate this violation, Sanoh must immediately begin managing the wastewater treatment sludge as F006 hazardous waste. The F006 hazardous waste wastewater treatment sludge must be transported using a licensed hazardous waste transporter to a permitted hazardous waste treatment, storage or disposal facility. A uniform hazardous waste manifest must accompany the shipment of hazardous waste to the permitted disposal facility. Sanoh must submit to me a copy of the manifest for the first shipment of F006 hazardous waste to a permitted hazardous waste disposal facility.

4) DOT Labeling, OAC Rule 3745-52-31:

Before transporting hazardous wastes or offering hazardous wastes for transportation off-site, the generator shall label each package of hazardous waste in accordance with the applicable United States department of transportation regulations on hazardous materials under 49 CFR Part 172.

As stated in Violation #1 above, Sanoh has shipped F006 hazardous waste wastewater treatment sludge to a licensed solid waste disposal facility as a non-hazardous waste. Thus, Shanoh has not been labeling the F006 hazardous waste in accordance with the proper United States department of transportation regulations.

To abate this violation, Sanoh must immediately begin managing the wastewater treatment sludge as F006 hazardous waste. Before transporting F006 hazardous waste wastewater treatment sludge or offering F006 hazardous waste wastewater treatment sludge for transportation off-site, Sanoh must label the roll-off container of F006 hazardous waste wastewater treatment sludge in

accordance with the applicable United States department of transportation regulations on hazardous materials under 49 CFR Part 172.

5) DOT Marking of Package, OAC Rule 3745-52-32(A):

Before transporting hazardous wastes or offering hazardous wastes for transportation off-site, the generator must mark each package of hazardous wastes in accordance with the applicable United States department of transportation regulations on hazardous materials under 49 CFR Part 172.

As stated in Violation #1 above, Sanoh has shipped F006 hazardous waste wastewater treatment sludge to a licensed solid waste disposal facility as a non-hazardous waste. Thus, Shanoh has not been marking the F006 hazardous waste in accordance with the proper United States department of transportation regulations.

To abate this violation, Sanoh must immediately begin managing the wastewater treatment sludge as F006 hazardous waste. Before transporting F006 hazardous waste wastewater treatment sludge or offering F006 hazardous waste wastewater treatment sludge for transportation off-site, Sanoh must mark the roll-off container of F006 hazardous waste wastewater treatment sludge in accordance with the applicable United States department of transportation regulations on hazardous materials under 49 CFR Part 172.

6) DOT Placarding, OAC Rule 3745-52-33:

Before transporting hazardous wastes or offering hazardous wastes for transportation off-site, a generator must placard or offer the initial transporter the appropriate placards according to United States department of transportation regulations for hazardous materials under 49 CFR Part 172 subpart F.

As stated in Violation #1 above, Sanoh has shipped F006 hazardous waste wastewater treatment sludge to a licensed solid waste disposal facility as a non-hazardous waste. Thus, Shanoh has not been placarding the F006 hazardous waste in accordance with the proper United States department of transportation regulations.

To abate this violation, Sanoh must immediately begin managing the wastewater treatment sludge as F006 hazardous waste. Before transporting F006 hazardous waste wastewater treatment sludge or offering F006 hazardous waste wastewater treatment sludge for transportation off-site, Sanoh must placard the roll-off container of F006 hazardous waste wastewater treatment sludge in accordance with the applicable United States department of transportation regulations on hazardous materials under 49 CFR Part 172 subpart F.

7) Accumulation Date on Hazardous Waste Containers, OAC Rule 3745-52-34(A)(2)

The generator must mark the date that hazardous waste accumulation begins on the container in which the hazardous waste is being accumulated.

As stated in Violation #1 above, Sanoh has been managing F006 hazardous waste wastewater treatment sludge as non-hazardous waste. Thus, the facility has not marked the accumulation date on the roll-off container used to accumulate the F006 hazardous waste under the facility filter press.

To abate this violation, Sanoh must immediately begin managing the wastewater treatment sludge as F006 hazardous waste. Sanoh must place a hazardous waste label on the roll-off container used to accumulate F006 hazardous waste wastewater treatment sludge under the facility filter press. The hazardous waste label must be marked with the date hazardous waste began accumulating in the container. Sanoh must submit to me a photograph of the hazardous waste label that clearly shows that the date of accumulation has been marked on the container.

8) Marking of Hazardous Waste Containers, OAC Rule 3745-52-34(A)(3)

The generator must mark containers accumulating hazardous waste with the words, "hazardous waste."

As stated in Violation #1 above, Sanoh has been managing F006 hazardous waste wastewater treatment sludge as non-hazardous waste. Thus, the facility has not marked the roll-off container used to accumulate the F006 hazardous waste under the facility filter press with the words, "hazardous waste."

To abate this violation, Sanoh must immediately begin managing the wastewater treatment sludge as F006 hazardous waste. Sanoh must place a hazardous waste label on the roll-off container used to accumulate F006 hazardous waste wastewater treatment sludge under the facility filter press. Sanoh must submit to me a photograph of the roll-off container that clearly shows that the label has been applied to the roll-off container.

9) Annual Report, OAC Rule 3745-52-41(A)(5)

Generators must provide a description, U.S. EPA hazardous waste number, U.S. department of transportation hazard class, and quantity of each hazardous waste shipped off-site for shipments to a treatment, storage, or disposal facility. This information must be listed by U.S. EPA identification number of each such off-site facility to which waste was shipped.

As stated in Violation #1 above, Sanoh has been managing F006 hazardous waste wastewater treatment sludge as a non-hazardous waste and transporting the waste to a licensed solid waste disposal facility. Sanoh has not been reporting the F006 hazardous waste wastewater treatment sludge on the annual report submitted to the Ohio EPA by March first of each year.

To abate this violation, Sanoh must submit a revised annual report for reporting years 2008, 2009 and 2010 to Paula Canter, Ohio EPA, Division of Materials and Waste Management, P.O. Box 1049, Columbus, OH 43216-1049.

10) Land Disposal Restrictions, Notification Requirements, OAC Rule 3745-270-07(A)(1):

Generators must have paperwork required in Column A of Table 1 of OAC Rule 3745-270-07 completed when a waste is being shipped off site and does not meet the treatment standards. Generators must also identify the waste codes and the correct treatability group applicable to the waste. Sanoh did not use a land disposal restriction form that identifies the waste codes and

treatability group of the F006 hazardous waste wastewater treatment sludge as stated in Violation #1 above.

To abate this violation, Sanoh must immediately begin managing the wastewater treatment sludge as F006 hazardous waste. The F006 hazardous waste wastewater treatment sludge must be transported using a licensed hazardous waste transporter to a permitted hazardous waste treatment, storage or disposal facility. Sanoh must submit to me the completed land disposal restriction form for the first shipment of F006 hazardous waste to a permitted hazardous waste disposal facility.

In addition to the above violations, Ohio EPA has the following comment:

- 1) In accordance with OAC Rule 3745-66-74, container storage areas must be inspected on a weekly basis. These inspections must be recorded in a log which includes the date and time of inspection, the name of person conducting the inspection, observations made, and the date/nature of any repairs.

As stated in Violation #1 above, Sanoh has been managing F006 hazardous waste wastewater treatment sludge as non-hazardous waste. The facility has completed weekly inspections of the roll-off container used to accumulate F006 hazardous waste wastewater treatment sludge and records these inspections in a log titled, "Combined Hazardous Waste and Storm Water Pollution Weekly Checklist". However, unlike the other hazardous waste storage areas in this checklist, Sanoh does not check to see if the roll-off container is properly labeled.

Sanoh should add the question, "Is the box properly labeled and dated?" to the "Combined Hazardous Waste and Storm Water Pollution Weekly Checklist" section titled, "Waste Water Sludge Hopper". Sanoh should submit copy of the revised checklist to me.

As we discussed during the inspection, you may be able to reduce the waste your company generates. If you find ways to recycle, reduce or eliminate the amount of waste that your company generates you may be able to reduce treatment and disposal costs as well as regulatory requirements. During the inspection, we observed potential P2 opportunities associated with your operation(s). P2 options that you may want to evaluate for this (these) operations include recycling of your F006 hazardous waste wastewater treatment sludge for the zinc content.

REMARKS.GENERAL INFORMATION

General Process Information:

Sanoh America is a manufacturer of automotive brake lines and fuel lines. Third party 3/16" - 3/8" carbon steel and copper coated carbon steel tubing is uncoiled, rinsed and plated with nearly pure zinc. After zinc plating, the tubing is coated with paint or poly vinyl and cut to length for shipping. Waste water from the plating line is treated on-site in a waste water treatment plant which produces filter cake that is managed as a non hazardous solid waste and waste water that is discharged to the city of Findlay sanitary sewer.

Regulatory/Enforcement History (if applicable):

Sanoh has been inspected previously on 1/30/1990 (1 secondary violation), 4/11/1995 (5 secondary violations), 8/14/2001 (5 secondary violations) and 5/17/06 (11 secondary violation, 1 SNC). On 5/17/06, Sanoh, formerly known as Hisan, Inc. transported 30 gallons of unused boiler coolant, descaling material (pH 14) to an unpermitted facility (Vexor).
