Re: Storm Water Inspection at County Road 142

Dear Mr. Johnson:

This letter is written regarding the storm water inspection I conducted at County Road 142 on August 18, 2009, and September 1, 2009. The Agency understands that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following items must be addressed:

Sediment and Erosion Controls

- The stream work associated with the unnamed tributary to South Fork Creek remains unprotected. I spoke with the on-site contractor who indicated controls had been recently removed in preparation for final stabilization. Please ensure this stream segment is completely stabilized within three (3) days of receiving this letter. Corrective actions were noted concurrent with the September 1, 2009 inspection.
- As requested, I see no evidence of placement of check dams within the roadside ditches of County Road 142. Please ensure these check dams and/or sediment basins are installed to ensure effective sediment control during all phases of construction. Corrective actions were noted concurrent with my September 1, 2009 inspection. In addition, sediment traps were installed within the road side ditch
- Please ensure continued compliance with the permit for the second phase of construction with controls noted during my September 1, 2009, inspection.

Ted Strickland, Governor
Lee Fisher, Lieutenant Governor
Chris Korleski, Director
