Terry Lively
City of Delaware
1 South Sandusky Street
Delaware, OH 43015

Dear Mr. Lively:

This letter is written regarding a storm water inspection I conducted of the construction activities associated with Henry Bike Path and Springfield Branch Trail, located in Delaware County, on November 2, 2006. I understand this site is currently covered under our General Storm Water Permit associated with Construction Activities. Based on my site observations and the conditions set forth in the General Permit, the following items will be required:

Sediment and Erosion Controls:

- The majority of the construction along Henry Street appears to be completed and at final grade. In accordance with the General Permit, erosion protection for this area will be required within seven days.
- The sediment controls associated with the fill placement east of Henry Street have failed and will require maintenance.
- Winter stabilization will be required for this project. Given the time of year, alternate erosion control measures, such as, crimped mulching, straw mulch with netting, and/or erosion control matting will be required for all areas which are barren and remain idle for over 21 days.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3844. In addition, please provide a written response, addressing action items required, within seven days of receipt. A follow up inspection will be conducted to ensure all requirements of the General Storm Water Permit are met.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
