**HOCKING COUNTY  
GENERAL FILE  
(THE CONSTRUCTION CREW)  
DHWM/SEDO  
NON NOTIFIER**

Mr. Chris Wolfe  
The Construction Crew  
P.O. Box 914  
35150 Linton Road  
Logan, Ohio 43138

Dear Mr. Wolfe:

On August 26, 2009, Ohio EPA conducted a complaint investigation of The Construction Crew's facility in Logan, Ohio in response to a complaint received by this office. The complainant alleged that an open drum of used oil being stored outside the building was leaking onto the ground. You were not present during the investigation, however, I spoke with your office manager, Carla Mohler.

Based on my investigation, I found the following violations of Ohio's hazardous waste laws:

- OAC Rule 3745-279-22 (D), Used Oil Storage Requirements for Generators:**  
Upon detection of a release of used oil to the environment, a used oil generator must stop the release, contain the released used oil, clean up and properly manage the released used oil and materials used to clean up the used oil, and if necessary, repair or replace any leaking used oil storage containers prior to returning them to service for used oil storage.

A small amount of used oil was leaking from one of the drums onto the ground surface next to the facility.

Based on a follow up inspection of your facility conducted on September 1, 2009, the leak was stopped, contaminated soils were cleaned up and placed in the dumpster, and the oil was sent offsite to a recycler. Therefore, your company has now abated this violation.

## GENERAL COMMENTS

- a) As a generator of used oil, you must maintain in your files receipts for all offsite shipments of used oil to a recycler. You may self transport no more than 55 gallons at a time of your used oil in your company vehicle or your own vehicle or that of one of your employees. Used oil must be delivered to a used oil collection center that is registered with the Ohio EPA to manage used oil. If you have your used oil transported by someone other than as described above, the transporter must have obtained a USEPA ID number. In other words, you cannot provide your used oil to someone who is using it for heating oil unless they have the proper EPA registration and have done the proper analysis to determine that your used oil is not contaminated with excess levels of hazardous waste (such as spent lacquer thinner or paint) that you mix into your used oil. Mixing small quantities of hazardous waste into your used oil is permissible so long as you generate no more than 27.5 gallons per month of hazardous waste. You may find a list of registered used oil recyclers at the following link:

<http://www.epa.state.oh.us/ocapp/p2/recyc/oilmark.html>

Should you have any questions, please feel free to call me at (740) 380-5293. You can find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm>.

Sincerely,

Donna Goodman  
District Representative  
Division of Hazardous Waste Management

DG/dh

Enclosure

**NOTICE:**

Ohio EPA's failure to list specific deficiencies or violations in this letter does not relieve your company from having to comply with all applicable regulations.

11. Waste Codes for Federally Regulated Hazardous Wastes. Please list the codes for the federally regulated hazardous waste handled at the site. List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page if more space is needed. If there are more than 7 waste codes and they are the same as listed in the most recent RCRAInfo source record, you do not need to list them all. Instead just indicate the date of the most recent source record.			
12. Comments: Use this area to describe whether the inspection was announced, whether the waste is stored in tanks or containers, etc.
