**Re: Management of Scrap Tires – Woody's Auto Salvage  
Third Follow-up Inspection**

Dear Mr. Baker:

During the late morning of September 29, 2009, I stopped at your auto salvage operation located at 1988 McKinley Avenue to discuss and observe how many additional tires have been removed from the area outside of the perimeter fence since my last inspection on July 30, 2009.

During our conversation you indicated that you have removed an additional 500 scrap tires since then for a total of approximately 1200 tires. Currently you are working on what was the largest pile of tires. Once this pile is removed, there is another much smaller pile (approximately 200 tires) located near the northeast corner of your property. You should continue to concentrate on removing those scrap tires that are off rim and holding water. Eventually, all of the scrap tires will need to be collected and removed.

If you have any questions, please feel free to call me at 728-3890. I can also be reached by email at [phil.farnlacher@epa.state.oh.us](mailto:phil.farnlacher@epa.state.oh.us).

Sincerely,

Phil Farnlacher  
Environmental Specialist
