RE: RETURN TO COMPLIANCE

Dear Mr. Holmes:

Thank you for your recent responses to Ohio EPA's November 18, 2009 Notice of Violation letter. The documentation you submitted included:

- photographs of the centralized emergency spill/decontamination kit that has been placed in the area where hazardous waste is handled, documentation of implementing an inspection schedule for the spill kit and emergency equipment and supplies, and an inspection checklist for recording the monthly inspections of these items (submitted 11/11/09);
- a contingency plan for the facility that describes the actions facility personnel must take in response to fires, explosions, or any unplanned, sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water and that reflects current conditions at the facility, including an updated list of emergency coordinators (submitted 11/20/09);
- a copy of the weekly inspection log that contains the last two weeks of completed inspections for the <-90-day roll-off box containing K060/K087 iron filter cake waste (submitted 11/24/09); and
- documentation of a personnel training program which teaches facility personnel hazardous waste management procedures and emergency response procedures (including contingency plan implementation) relevant to their positions (submitted 12/3/09).

A review of the documentation you submitted shows that Honeywell International Inc. has now abated all violations that were discovered during the October 28, 2009 hazardous waste inspection.

Should you have any questions regarding this letter, please feel free to call me at 740-380-5237.

Sincerely,

Vicky D. German
Environmental Specialist
Division of Hazardous Waste Management
