**PIKE COUNTY  
PARKER HANNIFIN  
RCRA  
OHD046426409**

Mr. Rick Taylor  
Parker Hannifin Corp.  
6035 Parkland Blvd.  
Cleveland, Ohio 44124-4141

Dear Mr. Taylor:

On December 14, 2010, Steve Saines and I inspected Parker Hannifin Corporation's (PHC) Waverly, Ohio facility to determine PHC's compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC) and the December 27, 2000, Director's Final Findings and Orders (DFFOs). Parker Hannifin was represented by Jason Brown, Consultant.

We found the following violations of Ohio's hazardous waste laws and the DFFOs. In order to correct those violations, you must do the following and send me the following **within thirty days** of the date of this letter:

- (1) **OAC Rule 3745-54-100(E)(1) and (E)(2) and section V. 2. of the December 27, 2000 Director's Final Findings and Orders (DFFOs):** (E)1) The owner or operator must conduct a corrective action program to remove, or treat in place, any hazardous constituents in groundwater that exceed specified concentration limits between the compliance point under rule 3745-54-95 of the Administrative Code and the down gradient property boundary; (E)2) The owner or operator must conduct a corrective action program to remove or treat in place any hazardous constituents under rule 3745-54-93 of the Administrative Code that exceed concentration limits under rule 3745-54-94 of the Administrative Code in ground water beyond the facility boundary, where necessary to protect human health and the environment, unless the owner or operator demonstrates to the director that, despite the owner's best efforts, the owner or operator was unable to obtain the necessary permission to undertake such action. The owner/operator is not relieved of all responsibility to clean up a release that has migrated beyond the facility boundary where off-site access is denied. On-site measures to address such releases will be determined on a case-by-case basis. PHC continues to violate 3745-54-100(E)(1)&(2) by its failure to control and capture the release of VOC-laden ground water along its facility boundary with Pee Pee Creek. During this annual inspection, Ohio EPA noted that ground water recovery well pumping in the plume management area near Pee Pee Creek has decreased to levels below 140 gpm over the past few months due to unresolved maintenance issues. Ohio EPA has anticipated significant decreases in ground water VOC content down gradient of the

new recovery well extraction system since 2007. The AECOM-Parker ground water model (completed in 2008) predicts that at a pumping rate of 140 gpm or more, the hydraulic gradient between the recovery well network and Pee Pee Creek is minimized to the extent that declining VOC concentrations in ground water discharging to Pee Pee Creek is predicted. This expected trend is jeopardized due to the recent decreases in the ground water pumping rate.

In order to abate this violation PHC must immediately take steps necessary to pump at a rate that is consistent with the AECOM-Parker groundwater model (a minimum of 140 gpm).

**Please note that failure to maintain and operate the groundwater treatment system in a manner which effectively captures and treats groundwater contamination could result in additional violations of the December 27, 2000 DFFOs and may lead to escalated enforcement action.**

- (2) **OAC Rule 3745-279-22,(C), Used Oil Storage Requirements for Generators:** Containers and tanks of used oil must be labeled with the words "Used Oil".

A thirty-gallon drum of used oil accumulating inside the treatment building was not labeled with the words "used oil". During the inspection, Mr. Brown properly labeled the drum. Therefore, this violation has now been abated.

#### **GENERAL COMMENTS**

- A. During the inspection, we also evaluated compliance with the deed restriction which was filed by PHC for the Parker Hannifin property, as evidenced by an acknowledgement of receipt by the City of Waverly on 4/22/96. The deed restriction requires PHC to "restrict the disturbance of the contaminated groundwater except for those purposes detailed in Parker's closure/post-closure plan submitted to the Ohio EPA." According to the closure/post-closure plan dated January 1993 (and all subsequent revisions), PHC is obligated "to restrict disturbance in accordance with Rules 3745-66-10 to 374566-20 or the Administrative Code" of Ohio ("OAC"). Based on Ohio EPA's December 14, 2010, inspection and previous site visits conducted by Ohio EPA in 2010, PHC is in compliance with this deed restriction.
- B. Numerous phone calls and email messages from Ohio EPA to Martha Connell since August have gone unanswered even though according to her secretary, she has been in the office. We were unable to reach her to schedule the December inspection, and thus had to contact the local consultant, instead. This is of concern to Ohio EPA because PHC and Ohio EPA have had several years of good faith efforts to work together to remedy the groundwater plume. Please immediately contact me to discuss this.
- C. Ohio EPA is particularly concerned about PHC's lack of response to the need to replace 400 feet of outfall pipe which is significantly scaled up, according to your consultant, Mr. Brown. A portion of this pipe collapsed several months ago and while PHC took steps to replace 30 feet of pipe, they have not yet taken steps to

replace the remaining 400 feet of pipe which is in danger of failure. Their attempts to contact Martha Connell of PHC regarding this issue have gone unanswered. As a result of this inaction, RW #4 has been turned off to decrease the flow to the outfall, and RWs 5 and 6 have been running at 124 GPM, which is less than optimal to capture the plume. PHC should contact me immediately to discuss this issue.

- D. PHC failed to follow through on its plans to install seven air sparging wells as proposed in their 2010 annual report to Ohio EPA. PHC should immediately contact me to discuss this.
- E. Five or six drums of nonhazardous waste from replacement of well 19-S are stored in the treatment plant. Please describe PHC's plans and timetable for disposal of these drums.

Should you have any questions, please feel free to call me at (740) 380-5293. You can find copies of the rules and other information on the division's web page at <http://www.epa.ohio.gov/dhwm>.

Sincerely,

Donna Goodman  
District Representative  
Division of Hazardous Waste Management

DG/jg

cc: Martha Connell, Parker Hannifin Corporation  
Steve Saines, DDAGW, SEDO

**NOTICE:**  
***Ohio EPA's failure to list specific deficiencies or violations in this letter does not relieve your company from having to comply with all applicable regulations.***

**Comments:**

**CONDITIONALLY EXEMPT SMALL QUANTITY GENERATOR REQUIREMENTS  
COMPLETE AND ATTACH A PROCESS, WASTE, P2 SUMMARY SHEET**

CESQG: #100Kg. (Approximately 25-30 gallons) of waste in a calendar month or < 1 Kg. of acutely hazardous waste.  
SQG: Between 100 and 1,000 Kg. (About 25 to under 300 gallons) of waste in a calendar month.

LQG:  $\geq 1,000$  Kg. (~300 gallons) of waste in a calendar month or  $\geq 1$  Kg. of acutely hazardous waste in a calendar month.

NOTE: To convert from gallons to pounds: Amount in gallons x Specific Gravity x 8.345 = Amounts in pounds.

Safety Equipment Used:

**WASTE EVALUATION**

1. Have all wastes generated at the facility been adequately evaluated? [3745-52-11] Yes  No  N/A

**GENERATOR CLASSIFICATION**

2. Does the generator produce <100 kg. of hazardous waste per month? [conditionally exempt small quantity generator ("CESQG")] Yes  No  N/A

NOTE: If quantities of hazardous waste accumulated on-site at any one time exceed 1,000 Kg. - or the generator produces between 100 and 1,000 Kg. of hazardous waste per month, it is operating as a Small Quantity Generator ("SQG"). If so, complete the Small Quantity Generator Requirements checklist.

**OFF-SITE SHIPMENT OF HAZARDOUS WASTE**

3. Does the CESQG ensure delivery of hazardous waste(s) to an off-site permitted TSD? [3734.02(F)] Yes  No  N/A

**TREATMENT OF HAZARDOUS WASTE**

4. Does the generator treat hazardous waste in a:
- a. Container that meets 3745-66-70 to 3745-66-77? Yes  No  N/A
  - b. Tank that meets 3745-66-90 to 3745-66-101 except 3745-66-97(C)? Yes  No  N/A
  - c. Drip pads that meet 3745-69-40 to 3745-69-45? Yes  No  N/A
  - d. Containment building that meets 3745-256-100 to 3745-256-102? Yes  No  N/A

NOTE: Complete appropriate checklist for each unit.

NOTE: If the CESQG conducts treatment they are subject to the LQG requirements.

NOTE: If waste is treated to meet LDRs, use LDR checklist.

**REMARKS**

(over)

Company ceased operations many years ago and is in post-closure/corrective action since December 27, 2000, Director's Final Findings and Orders. Per an approved Corrective Action Management Plan (CAMP) as required by December 27, 2000 DFFOs, PHC constructed a new air sparging/soil vapor extraction system (AS/SVES). The AS/SVES should have been operating by the end of 2004 however delays acquiring equipment problems with PHC's contractor occurred. The system was completed and placed online in November 2005.

Ohio EPA expected that significant control of the VOC plume in the vicinity of Pee Pee Creek would have taken place by the end of 2006, more than a year after the installation of new corrective action remedies on site. This has not yet occurred. During the 2010 annual inspection, Ohio EPA noted that ground water recovery well pumping in the plume management area near Pee Pee Creek has decreased to levels below 140 gpm over the past few months due to unresolved maintenance issues. The AECOM-Parker ground water model (completed in 2008) predicts that at a pumping rate of 140 gpm or more, the hydraulic gradient between the recovery well network and Pee Pee Creek is minimized to the extent that declining VOC concentrations in ground water discharging to Pee Pee Creek is predicted. This expected trend is jeopardized due to the recent decreases in the ground water pumping rate. PHC must immediately take steps necessary to pump at a rate that is consistent with the AECOM-Parker groundwater model (a minimum of 140 gpm).

**USED OIL INSPECTION CHECKLIST  
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

*NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.*

*2. Inspectors can check BUSTR's web-site at [https://www.comapps.ohio.gov/sfm/fire\\_apps/bust/bustr/PublicInquiry.asp](https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp) to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at:*

*[https://www.comapps.ohio.gov/sfm/fire\\_apps/bust/bustr/SearchByCounty.asp](https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/SearchByCounty.asp).*

**PROHIBITIONS**

1.	Does the generator manage used oil in a surface impoundment or waste pile? If yes:	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
----	---	--

a.	Is the surface impoundment or waste pile regulated as a hazardous waste management unit? [3745-279-12(A)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	---	--

*NOTE: For example, used oil contaminated scrap metal stored in a pile.*

2.	Is used oil used as a dust suppressant? [3745-279-12(B)]	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
----	--	--

3.	Is off-specification used oil fuel burned for energy recovery in devices specified in 3745-279-12(C)?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	---	--

*NOTE: Multiple used oil checklists may be applicable if used oil handler is performing multiple tasks (e.g., if generating used oil and shipping directly to a burner, complete generator and marketer checklists at a minimum).*

**GENERATOR STANDARDS**

4.	Does the generator mix hazardous waste with used oil? If so,	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
----	--	--

a.	Is the mixture managed as specified in 3745-279-10(B)? [3745-279-21(A)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	---	--

*NOTE: Used Oil mixed with listed (3745-51-30 to 3745-51-35) or characteristic (3745-51-20 to 3745-51-24) hazardous waste are subject to regulation as a hazardous waste, unless the listed hazardous waste is listed solely because it exhibits a hazardous characteristic, and the resultant mixtures do not exhibit a characteristic. Mixtures of used oil and CESQG hazardous waste are subject to OAC Chapter 3745-279.*

5.	Does the generator of a used oil containing greater than 1,000 ppm total halogens manage the used oil as a hazardous waste unless the presumption is rebutted successfully? [3745-279-21(B)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	--	--

*NOTE: If used oil contains greater than 1000 ppm total halogens, it is presumed to be listed hazardous waste until the presumption is successfully rebutted.*

6.	Does the generator store used oil in tanks; or containers; or a unit(s) subject to regulation as a hazardous waste management unit? [3745-279-22(A)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
----	--	--

7.	Are containers and aboveground tanks used to store used oil in good condition with no visible leaks? [3745-279-22(B)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
----	---	--

8.	Are containers, above ground tanks, and fill pipes used for underground tanks clearly labeled or marked "Used Oil"? [3745-279-22(C)]	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
----	--	--

9.	Has the generator, upon detection of a release of used oil, done the following: [3745-279-22(D)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	--	--

a.	Stopped the release?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	----------------------	--

b.	Contained the release?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	------------------------	--

c.	Cleaned up and properly managed the used oil and other materials?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	---	--

d.	Repaired or replaced the containers or tanks prior to returning them to service, if necessary?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	--	--

[Facility Name/Inspection Date]

[ID Number]

Used Oil Checklist for Generators/August 2009

Page 1 of 2

**ON-SITE BURNING IN SPACE HEATER**

10.	Does the generator burn used oil in used-oil fired space heaters? [3745-279-23] If so:	
a.	Does the heater burn only used oil that owner/operator generates or used oil received from household do-it-yourself (DIY) used oil generators?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
b.	Is the heater designed to have a maximum capacity of not more than 0.5 million BTU per hour?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
c.	Are the combustion gases from heater vented to the ambient air?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

*NOTE: Ash accumulated in a space heater must be managed in accordance with 3745-279-10(E).*

**GENERATOR TRANSPORTATION**

11.	Does the generator have the used oil hauled only by transporters that have obtained a U.S. EPA ID#? [3745-279-24]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
12.	If the generator self-transport used oil to an approved collection site or to an aggregation point owned by the generator: [3745-279-24]	
a.	Does the generator transport used oil in a vehicle owned by the generator or an employee of the generator? [3745-279-24]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
b.	Does the generator transport more than 55 gallons of used oil at any time? [3745-279-24]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

*NOTE: Used oil generators may arrange for used oil to be transported by a transporter without a U.S. EPA ID # if the used oil is reclaimed under a contractual agreement (i.e., tolling arrangement).*

**COLLECTION CENTERS AND AGGREGATION POINTS**

13.	Is the DIY used oil collection center in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-30]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
14.	Is the non-DIY used oil collection center registered with Ohio EPA? [3745-279-31]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
15.	Is the used oil aggregation point in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-32]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

*NOTE: Complete Used Oil Generator and any other applicable used oil handler checklist (e.g., marketer, burner, etc.) for used oil collection centers and aggregation points.*
