Mr. Kevin Darst
Three-C Body Shop
2300 Briggs Road
Columbus, OH 43223

Dear Mr. Darst:

On September 13, 2011, Ohio EPA inspected Three-C Body Shop of Chillicothe, Ohio to determine compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Three-C Body Shop was represented by employee Mike Allen.

We found the following violations of Ohio's hazardous waste laws. In order to correct these, you must do the following and send me the required information **within 21 days** of the date of this letter:

- (1) OAC Rule 3745-273-13 (D)(1), Waste Management Standards for Small Quantity Handlers of Universal Waste:** Universal waste lamps must be contained in containers that are structurally sound, adequate to prevent breakage, and compatible with their contents. Such containers must remain closed.

Three-C Body shop failed to close boxes containing spent universal waste lamps in accordance with this rule. In order to correct this violation, please immediately begin storing lamps in closed boxes and submit a photograph of properly closed boxes.

- (2) OAC Rule 3745-273-14(E), Labeling/Marking Standards for Small Quantity Handlers of Universal Waste:** Each universal waste lamp or container of lamps must be labeled with one of the following phrases: "Universal Waste-Lamps" or "Waste Lamps" or "Used Lamps."

Three-C Body Shop failed to label universal waste spent lamps. In order to abate this violation, please immediately begin to properly label your spent lamps and submit a photograph of properly labeled lamps.

- (3) OAC Rule 3745-279-22 (C) and (D), Used Oil Storage Requirements for Generators:** (C) Containers and tanks of used oil must be labeled with the words "Used Oil".

Three-C Body shop had an unlabeled pan of used transmission oil sitting on top of a drum of used antifreeze. In order to abate this violation, please contain all used oil in a properly labeled drum, and submit a photograph of the properly labeled drum.

GENERAL COMMENTS

- (a) During the inspection, we observed spent paint booth filters contained in unclosed plastic bags. Mr. Mike Allen was unable to provide adequate information on how paint booth filters are being disposed of. However, according to you, spent paint booth filters are currently being managed as a hazardous waste and are being sent for disposal to Heritage Crystal Clean. Please submit the last three manifests for disposal of spent filters, as well as an estimate of the volume of filters that has been generated each month. Also, please ensure that filters are contained in closed bags until they are sent offsite for disposal.
- (b) During the inspection, we were informed that a new paint and paint gun cleaning system is being used. According to you, the new paint gun cleaning system should generate very small volumes of filter cake, which you said would be a hazardous waste. The old paint gun cleaning system, a Herkules Cleaner, remains onsite. In addition, two 55-gallon drums of hazardous waste paint thinner/paint (F003/F005/D007/D008) were onsite. Since it does not appear as though you are using this gun cleaner and therefore are no longer generating waste paint thinner, it is recommended that you empty any residuals from the cleaner into the drums and manifest these drums offsite to a hazardous waste treatment, storage or disposal facility. I recommend that you start accumulating the filter cake from your new cleaning system in a fresh drum. Please submit a description of how you plan to manage the new waste, and manifests from the removal of the two old drums of waste.
- (c) Please submit receipts for the most recent offsite shipment of universal waste from the Chillicothe facility, and a description of how you track the length of time universal waste has been accumulating onsite. The following links will provide information on how to properly manage your universal waste spent lamps, and a list of lamp recyclers:
