Mr. Eric Hay
2243 State Route 516, N.W.
Dover, OH 44622

Dear Mr. Hay:

On June 23, 2011 Kimbra Reinbold and I investigated a complaint and inspected Wayne Auto Parts' facility in Dover, Ohio for compliance with Ohio's hazardous waste and used oil laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC).

This letter will explain the validity of the complaint, the violation found by our inspection, and what you need to do to correct the violation.

According to the complaint received by Ohio EPA, the complainant alleged that Wayne Auto Parts (Wayne) was deliberately dumping oil and antifreeze on the ground, had drain pans full of oil overflowing with rainwater, and that asphalt from the site was getting into the river.

Our investigation of the complaint allegations found no evidence of deliberate dumping of oil or antifreeze. No drain pans overflowing with rainwater were seen. Outside the transmission building on the concrete pad next to the building and the ground adjacent to it, we did observe staining from releases of used oil. There were chunks of asphalt on the Wayne property near the river, however, this is not a concern to Ohio EPA.

My inspection found that Wayne is a used oil generator but is not generating any hazardous waste. The following violation of Ohio's used oil regulations was found. In order to correct this violation, you must do the following and **send me the required information within 30 days of your receipt of this letter.**

- (1) ***OAC Rule 3745-279-22(D), Used Oil Storage Requirements for Generators:***
Upon detection of a release of used oil to the environment a generator must perform the following cleanup steps: stop the release; contain the released used oil; clean up and manage properly the released used oil and other materials; and if necessary repair or replace any leaking used oil storage containers or tanks prior to retuning them to service.

Mr. Eric Hay
July 8, 2011
Page 2

Outside the transmission building on the concrete pad next to the building and the ground adjacent to it, staining from releases of used oil were observed. Wayne did not contain and cleanup the released used oil as required by this rule. During the inspection, you had employees place oil dry on the concrete pad, showing a good faith effort to begin cleanup of the oil.

In order to return to compliance with this rule, Wayne must clean up the spilled used oil by excavating all gravel and soil that is visibly stained with used oil. Excavated soil must then be managed as a solid waste and properly disposed of in a licensed solid waste landfill. To demonstrate your compliance with this rule, submit photographs of the area after excavation and landfill disposal receipts for the excavated soil to Ohio EPA for review.

Comments

- (a) During our investigation and inspection, we observed barrels on your property that had been used for trash burning. Under Ohio law garbage may not be burned at any time. Enclosed with this letter is a fact sheet titled *Before You Light It...* which explains Ohio's open burning regulations.

Enclosed you will find a copy of the checklists completed during the inspection. Should you have any questions, please feel free to call me at (740) 380-5248. You can find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm/>.

Sincerely,

PROCESS DESCRIPTION SECTION

Wayne Auto Parts (Wayne) purchases wrecked late model vehicles to salvage and re-sell their parts. Vehicles that are purchased by Wayne first go to Wayne's warehouse building. In the warehouse building all fluids (motor oil, transmission fluid, gas, brake fluid, washer fluid, and antifreeze) are removed from the vehicles, as are mercury switches and batteries. Parts, such as, transmissions; engines; wheels; and electronics are also removed in the warehouse building. The remaining vehicle hulk is stored outside in a salvage yard. The parts that are removed from the vehicle are stored indoors in warehouse buildings.

WASTE ACTIVITIES

Wayne generates used oil but is not a generator of hazardous waste. The materials and wastes generated by Wayne are managed as follows.

Vehicle parts are cleaned in **parts washer** with Safety Kleen Premium Gold solvent. The solvent is not a hazardous waste. Safety Kleen services the parts washer every 3 to 4 months, removing 20 gallons of waste solvent for disposal by Safety Kleen.

Anti-freeze is separated by type, filtered and re-sold by the gallon.

Used Oil is collected in drums and tanks and burned on-site in a Clean Burn CB-1800 oil burning furnace to heat the warehouse building.

Mercury switches are recycled with EQ Industrial (Ypsilanti, MI)

Scrap Metal is sold to Wooster Iron & Metal

Lead Acid Batteries are re-sold or recycled

Tires go to Liberty Tire

Gas removed from vehicles is reused in the yard trucks

REGULATORY/ENFORCEMENT HISTORY (if applicable):

This is Wayne's first hazardous waste/ used oil inspection.

**USED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at: https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/SearchByCounty.asp.
