Mr. Nick Loeber, President
Iddings Trucking
741 Blue Knob Road
Marietta, OH 45750

Dear Mr. Loeber:

On April 27, 2011, Ohio EPA inspected Iddings Trucking in Marietta, Ohio to determine Iddings' compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). Iddings was represented by you. This letter will explain the violations I found, what you need to do to correct the violations, other general concerns we have, what you need to do to respond to my general concerns and any pollution prevention opportunities I identified.

I found the following violations of Ohio's hazardous waste laws. In order to correct these violations, you must do the following and send me the required information **within 30 days** of the date of this letter:

- (1) **OAC Rule 3745-279-22,(C) Used Oil Storage Requirements for Generators:** (C) Containers and tanks of used oil must be labeled with the words "Used Oil";

Three 250-gallon tanks of used oil in your maintenance garage were not labeled. During the inspection, you labeled the tanks; therefore, this violation has now been abated.

GENERAL COMMENTS

- (a) Ohio EPA recommends that you recycle used oil filters. A list of used oil filter recyclers is enclosed.
- (b) During the summer months, Iddings sells used oil that it generates but is unable to burn in their used oil furnace. As a generator of used oil, you must maintain in your files receipts for all offsite shipments of used oil to a recycler. You may self-transport no more than 55 gallons at a time of your used oil in your company vehicle or your own vehicle or that of one of your employees. Used oil must be delivered to a used oil collection center that is registered with the Ohio EPA to

manage used oil. If you have your used oil transported by someone other than as described above, the transporter must have obtained a USEPA ID number. In other words, you cannot provide your used oil to someone who is using it for heating oil unless they have the proper EPA registration and have done the proper analysis to determine that your used oil is not contaminated with excess levels of hazardous waste (such as spent lacquer thinner or paint) that you mix into your used oil. Mixing small quantities of hazardous waste into your used oil is permissible so long as you generate no more than 27.5 gallons per month of hazardous waste. More information on management for used oil generators and a list of registered used oil recyclers can be found at the following links:

http://www.epa.ohio.gov/dhwm/used_oil.aspx

<http://www.epa.state.oh.us/ocapp/p2/recyc/oilmark.html>

- c. Iddings generates spent fluorescent lamps which may be a universal waste. Please refer to the following information when managing your spent lamps:

<http://www.epa.ohio.gov/dhwm/fluorescent.aspx>

- d. During the inspection, we briefly discussed the federal Spill Prevention, Control and Countermeasures requirements. Note that these regulations only apply to your company if you have aboveground storage capacity of 1320 gallons or more. These regulations are explained in a fact sheet which can be found at:

<http://www.epa.ohio.gov/portals/41/sb/publications/spcc.pdf>

Enclosed, you will find a copy of the checklists that were completed during the inspection. Should you have any questions, please feel free to call me at (740) 380-5293. You can find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm>.

Sincerely,

Donna Goodman
District Representative
Division of Materials and Waste Management

NOTICE:

Ohio EPA's failure to list specific deficiencies or violations in this letter does not relieve your company from having to comply with all applicable regulations.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations.
