Mr. Paul Lambert
Pioneer Clothing Care
1211 Washington Boulevard
Belpre, OH 45714

Dear Mr. Lambert:

On December 16, 2009, I conducted a compliance evaluation inspection at Pioneer Clothing Care located at 1211 Washington Boulevard in Belpre to determine compliance with Ohio's hazardous waste laws and regulations as found in the Ohio Revised Code (ORC) and the Ohio Administrative Code (OAC). During the inspection, I helped Pioneer Clothing Care identify ways to prevent pollution by reducing waste. This letter will explain the violations I found and what you need to do to correct the violations.

I found the following violations of Ohio's hazardous waste laws. In order to correct these violations, you must do the following and send me the required information **within 30 days** of your receipt of this letter:

(1) OAC Rule 3745-52-34(D)(4), Accumulation Time of Hazardous Waste:

A small quantity generator may accumulate hazardous waste that is generated on-site without an Ohio hazardous waste permit, provided that the date upon which each period of accumulation begins is clearly marked and visible for inspection on each container.

During the inspection, drums of spent filters and still bottoms in the hazardous waste storage shed were not marked with an accumulation start date, in violation of this rule. To abate this violation, Pioneer Clothing Care must mark the drums with the accumulation start date and submit photographs to this office documenting compliance with this rule.

(2) OAC Rule 3745-52-34(D), Accumulation Time of Hazardous Waste:

A small quantity generator may accumulate hazardous waste that is generated on-site without an Ohio hazardous waste permit, provided that while being accumulated, each container is labeled or marked clearly with the words "hazardous waste."

During the inspection, drums of spent filters and still bottoms in the hazardous waste storage shed were not labeled with the words "hazardous waste", in violation of this rule. To abate this violation, Pioneer Clothing Care must mark the drums with the words "hazardous waste" and submit photographs to this office documenting compliance with this rule.

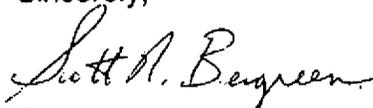

GENERAL COMMENT

- (a) Fluorescent bulbs contain mercury and can potentially exhibit the characteristic of toxicity for mercury or other metals when disposed, rendering them a hazardous waste. Ohio EPA recommends that the spent bulbs be placed in a box or other suitable container and then be recycled. Spent fluorescent bulbs are a universal waste and must be managed under the universal waste rules in OAC 3745-273. For your information, I have enclosed a fact sheet regarding fluorescent bulbs, including a recycler's list.

As we discussed during the inspection, you may be able to reduce the waste your company generates. If you find ways to recycle, reduce, or altogether eliminate the amount of waste that your company generates, you may be able to reduce treatment and disposal costs, and you may possibly reduce your regulatory requirements. The Ohio EPA strongly encourages pollution prevention as the preferred approach for waste management. The first priority of pollution prevention is to eliminate the generation of wastes and pollutants at the source (source reduction). For wastes or pollutants that are generated, the second priority is to recycle or reuse them in an environmentally sound manner. You may benefit economically, help preserve the environment, and improve your public image by implementing pollution prevention programs. You can find more information about pollution prevention, including fact sheets, at the following web address: <http://www.epa.state.oh.us/ocapp/Recycle.aspx>. If you would like to be considered for an in-depth on-site pollution prevention assessment, or if you would like more information about pollution prevention assessments, please contact me.

Enclosed, you will find a copy of the checklists that were completed during the inspection. Should you have any questions, please feel free to contact me at (740) 380-5288. You can find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm>.

Sincerely,

Scott N. Bergreen
Environmental Specialist
Division of Hazardous Waste Management

Ohio EPA's failure to list specific deficiencies or violations in this letter does not relieve your company from having to comply with all applicable regulations.

REMARKS-GENERAL INFORMATION

General Process Information:

Pioneer Clothing Care, located at 1211 Washington Boulevard in Belpre, is a dry cleaning business. Their business includes dry cleaning, shirt laundry, drapery cleaning, a coin laundry, and pickup services. A large part of Pioneer's business is cleaning and re-packaging previously worn Coldwater Creek apparel. Pioneer operates two Columbia dry to dry machines (30 and 40 pound machines), with a shared solvent still to reclaim perchloroethylene solvent for re-use. Solvent still bottoms are emptied from the machine each morning and transferred to drums stored in a shed behind the business. No satellite accumulation occurs at Pioneer. Machine filters are changed every 5 weeks and are also transferred to drums in the shed. Hazardous wastes are manifested off-site each month by Safety Kleen.

Regulatory/Enforcement History:

The last compliance evaluation inspection was conducted at Pioneer Clothing Care on February 10, 2005.

NOTE: Waste generated at one location and transported along a publicly accessible road for temporary consolidated storage or treatment on a contiguous property also owned by the same person is not considered "on-site" and manifesting and transporter requirements must be met. To transport "along" a public right-of-way the destination facility has to act as a transfer facility or have a permit because this is considered to be "off-site." For additional information see the definition of "on-site" in OAC rule 3745-50-10.
