RE: Compunet Troy, Generator Number 57-G-00068, Notice of Violation

Dear Ms. Haney:

On July 20, 2010, I conducted a large generator infectious waste inspection at the above mentioned facility, in your presence. This inspection was conducted in order to determine compliance with Ohio Administrative Code (OAC) 3745-27, specifically rules governing large generators of infectious waste. The findings of the inspection are as follows:

1. The spill cleanup procedure could not be located at the time of the inspection. This is a violation of OAC 3745-27-30(B)(10), which states;

Develop a spill containment and clean-up procedure. A copy of the procedure shall be posted or readily available on the premises to persons likely to handle infectious waste, including janitorial services. The name, address, and telephone number of the infection control manager or infectious waste control manager and their back-up, along with the location of all spill containment and clean-up materials/kits at this facility, shall be listed at the top of the spill containment and clean-up procedure. Copies of the procedure shall be provided at the request of the board of health with jurisdiction or the director of the Ohio EPA or their authorized representative.

Please provide a complete infectious waste spill procedure. At the top of the procedure provide the name, address, and telephone number of the infection control manager or infectious waste control manager and their back-up, along with the location of all spill containment and clean-up materials/kits at this facility.

2. The CompuNet Troy, Ohio location has relocated. Please complete the attached infectious waste generator amendment form to update the facility's generator registration or you can find the form at http://www.epa.state.oh.us/portals/34/document/guidance/gd_079.pdf.
