**RE: Upper Valley Medical Center (Quest) Troy, Ohio**

Dear Mr. Sharkey:

On November 1, 2010, I conducted a large generator infectious waste re-inspection at the above mentioned facility. This inspection was conducted in order to determine compliance with Ohio Administrative Code (OAC) 3745-27, specifically rules governing large generators of infectious waste. The findings of the inspection are as follows:

1. The spill cleanup procedure was provided during the inspection. Please be aware the spill procedure reviewed during the inspection was **not** the procedure you provided to me in your correspondence received October 28, 2010.
2. The biohazard spill kit was found complete.
3. If you have not yet amended your registration to specifically identify this facility location within the UVMC hospital campus please do so. For example please provide "Lab, Room \_\_\_". The registration form can be found online at [http://www.epa.state.oh.us/portals/34/document/guidance/gd\\_079.pdf](http://www.epa.state.oh.us/portals/34/document/guidance/gd_079.pdf).

If you have any questions, please contact me at (937) 285-6094.

Sincerely,

Jill Olberding, R.S.  
Division of Solid and Infectious Waste Management
