Re: Shiloh Mansfield Manufacturing Division  
Richland County  
Hazardous Waste Inspection  
Notice of Violation/Return to Compliance  
OHD 986 998 300

December 19, 2008

Mr. Brad E. Eubank, Environmental Engineer  
Shiloh Mansfield Manufacturing Division  
402 9<sup>th</sup> Avenue  
Mansfield, Ohio 44905

Dear Mr. Eubank:

Thank you for accompanying me during the Ohio Environmental Protection Agency's (Ohio EPA's) November 19, 2008, hazardous waste compliance evaluation inspection of Shiloh Mansfield Manufacturing Division (Shiloh) located at the address stated above. I inspected Shiloh to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC), and Chapter 3745 of the Ohio Administrative Code (OAC). Pollution prevention options were also discussed during this inspection. This letter will list observations I made during the inspection, and the violation found.

The inspection consisted of a tour of the facility, including areas where the wastes are generated and stored, and a review of related paperwork. Shiloh manufactures engineered stamping blanks which are sent to various stamping plants to be further molded/stamped into metal parts. Shiloh generates approximately 500 gallons of used oil every month. The used oil is sent out to be recycled. Also, Shiloh generates less than 25 gallons per month spent solvent from a parts washer. The spent solvent is managed as a hazardous waste (D001) and picked up by Crystal Clean. Shiloh manages mercury containing ballasts and spent light bulbs as universal waste. Other non-hazardous waste generated at the site include: scrap steel (recycled), ultra filtration sludge and the grinder swarf (solid waste). Shiloh was inspected as a conditionally exempt small quantity generator of hazardous waste.

I found the following violation of Ohio's hazardous waste laws. In order to correct this violation you must do the following and send me the required information within 30 days of your receipt of this letter.

1. **OAC Rule 3745-273-13(D)(1): Storage container requirements for universal waste lamps**

A small quantity handler of universal waste must manage lamps in a way that prevents releases to the environment. Lamps are required to be stored in containers that must remain closed at all times.

Shiloh failed to keep universal waste storage containers closed.

On November 28, 2008, you emailed me a digital photograph showing that the all universal waste containers had been properly closed. **This violation has been abated.**

The Division of Hazardous Waste Management has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign up for this free service. You can find more information at <http://www.epa.state.oh.us/dhwm/listserv.html>. Please feel free to share this information with your colleagues.

As we discussed during the inspection, you may be able to reduce the waste your company generates. If you find ways to recycle, reduce or altogether eliminate the amount of waste that your company generates you may be able to reduce your treatment and disposal costs. Thus, you may possibly reduce your regulatory requirements. Shiloh is currently recycling scrap steel, paper, and plastic. Ohio EPA has helpful information about pollution prevention at the following web address: [www.epa.state.oh.us/ocapp/ocapp.html](http://www.epa.state.oh.us/ocapp/ocapp.html).

Enclosed you will find a copy of the checklists that were completed during the inspection. You can find copies of the rules and other information on the division's web page at [www.epa.state.oh.us/dhwm](http://www.epa.state.oh.us/dhwm).

Should you have any questions or if I can be of assistance, please contact me at (419) 373-3015.

Sincerely,

Edgar V. Pulido  
Division of Hazardous Waste Management
