Re: Nollenberger Truck Center, Inc.
Hazardous Waste
Complaint # 2360
Wood County
Notice of Violation

September 11, 2008

Mr. George R. Mitchell
Nollenberger Truck Center, Inc.
P.O. Box 369
5320 U.S. Route 20
Stony Ridge, Ohio 43463

Dear Mr. Mitchell:

On August 21, 2008, I conducted a follow-up visit at Nollenberger Truck Center, Inc. (Nollenberger) located at 5320 U.S Route 20, Stony Ridge, Ohio from a complaint received by the Division of Hazardous Waste Management (DHWMM) on December 2, 2004. The complainant stated that Nollenberger cleans engines outside with a solvent mixture. An inspector from DHWMM did investigate this complaint on December 14, 2004, but was unable to speak with the general manager so the complaint was unresolved. Thus, on August 21, 2008, I proceeded to conduct a full compliance evaluation inspection (CEI) to determine Nollenberger's compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC), and Ohio's hazardous waste regulations as adopted under Chapter 3745. of the Ohio Administrative Code (OAC). This letter will explain the validity of the complaint, the violations I found, what you need to do to correct the one outstanding violation, one area of general concern, and what you need to do to satisfy this area of concern.

Upon arriving at your facility I discussed the original complaint with you. You stated that every once in awhile you do clean engines outside on the concrete, but that you use a soap cleaner, but you emphasized you do don't do this very often.

Nollenberger is a service garage (perform oil changes, etc.) for heavy trucks (semis). Nollenberger is a conditionally exempt small quantity generator of hazardous waste. Hazardous waste generated is solvent from the parts washer waste (D001). Other wastes generated at the facility include antifreeze, used oil, used oil filters, and fluorescent bulbs.

We walked around the property. I observed the concrete area where you stated that you have, in the past, periodically cleaned out engines. I did not observe any visible fluid pooling nor did I observe any visible staining on or around the concrete.

During the inspection, I gave you the following fact sheets Universal Waste Rules for Handlers of Lamps, The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil, Fluorescent Lamps – What you Should Know and a list of computer, fluorescent lamp & ballast recyclers.

I found the following violations of Ohio's hazardous waste laws. In order to correct the one outstanding violation you must do the following and send me the required information **within 30 days** of your receipt of this letter:

**1. Waste Evaluation.
OAC Rule 3745-52-11**

Any person who generates a waste must determine if that waste is a hazardous waste in accordance with the criteria for hazardous waste as set forth in Chapter 3745-51 of the Administrative Code.

Nollenberger has failed to evaluate the used oil filters generated from the servicing of large trucks (semis) to determine if they are hazardous.

Nollenberger hot drains all of its filters, and then once they are properly drained, the metal portion is thrown in the trash. Nollenberger must cease throwing these filters in the trash until a proper waste evaluation has been conducted (or Nollenberger may begin to recycle their scrap metal as an option in lieu of conducting a waste evaluation).

To properly evaluate the above waste stream, Nollenberger must do one of three options: 1) Nollenberger must take a representative sample of this waste to properly evaluate this waste stream through a laboratory analysis which lists constituents present and at what concentration. Nollenberger must sample their used oil filters to determine the concentrations of the RCRA metals and any other regulated volatile organics that may be present in the waste in light of the materials or the processes used as listed in the Ohio Administrative Code Rule 3745-51-24 following the methods as outlined in U.S. EPA's SW-846. Nollenberger may run total concentrations for these constituents as a screening tool. If the concentrations are detected for the constituents at or above the regulatory limit, a Toxicity Characteristic Leaching Procedure (TCLP) may be required to ensure this constituent is not present above the Ohio EPA regulatory level, or 2) Nollenberger must apply generator knowledge of the hazardous characteristic(s) of the waste in light of the materials or the processes used through adequate documentation, or 3) a combination of option one and two.

- To abate this portion of violation, Nollenberger must submit the analytical information or the documentation for generator knowledge to me. Your results must document if the waste is hazardous or not and, if hazardous, whether it is restricted from land disposal. If it is hazardous, you must explain what treatment, storage, or disposal facility you will send it to. If the waste is hazardous, I will determine the status of your compliance with other hazardous waste laws and notify you of my findings in a separate letter.
- As generator knowledge, Nollenberger can demonstrate whether the used oil filters they generate are terne-plated or not. Terne-plated filters could be regulated as hazardous based on their lead content (D008). Filters that are not terne-plated can be disposed as solid waste as long as they are properly drained.
- As discussed during the CEI, if Nollenberger recycles their used oil filters as scrap metal then they would not need to evaluate this waste. As long as the filters are properly hot drained and the metal recycled as scrap metal, the filters are excluded from regulation. If you choose this option, please provide me the name of the recycler of your scrap metal.

If you perform sampling, Ohio EPA will use the data you provide, in addition to other documentation, to make regulatory decisions concerning the wastes tested. The data you submit should be reviewed using a data review process, referred to as data validation, to confirm the validity of your data prior to submission. Data validation includes a review of the following components: laboratory test methods, laboratory data completeness, documentation of holding time(s), chain(s) of custody, and quality assurance/quality control (QA/QC) data.

To confirm the validity of your data, you may use Ohio EPA's tier 1 data validation plan review form which can be obtained from Ohio EPA's web page:
http://www.epa.state.oh.us/dhwm/tier_i_data_validation_manual.html. Ohio EPA may request the documentation needed to confirm the validity of the data submitted.

Please submit a brief narrative of each sampling event which includes: process generating the waste, point in the process the sample was obtained, sampling techniques used to obtain the sample and a description of how this sample was determined to be a representative sample of the waste tested.

In addition, if sampling is performed, please notify me at least seven days prior to taking the samples so that I or an Ohio EPA representative may be present.

**2. Used oil storage requirements - proper labels.
OAC Rule 3745-279-22 (C) (1)**

Containers used to store used oil shall be labeled or marked clearly with the words "Used Oil."

Nollenberger failed to mark their 1000-gallon used oil tank with the words "Used Oil."

"Used Oil" was written on the tank used to store used oil during the inspection on August 21, 2008. Thus, this violation has been abated.

Area of Concern:

1. Washing of engines outside.

I strongly suggested that Nollenberger discontinue ever power washing of engines outside – no matter how infrequently this may occur. You mix the engine cleaner at 20 parts water or 40 parts water to one of the cleaner and based then on the resultant mixture (based on your MSDS) your cleaner is non-hazardous; however, there may be some type of residue from the engines which could accumulate and cause you to create a waste which must be properly evaluated and disposed. In addition, it is not a sound practice to clean engines outside due to the potential of run-off, etc.

To satisfy this area of concern, please indicate how you plan to conduct this practice in the future.

General Comments:

- Inside your shop there is a center type drain with grating over the top which collects general residue from your shop. I asked if you cleaned that out. You stated that you have not cleaned this drain for a long time but that someone pumps this material out.

Please note that if and when this drain is cleaned out, this waste material must be evaluated to determine if it hazardous like any waste stream that may be generated at your facility.

- I spoke with Eric Weiss of Vesco and he stated that used oil that is picked up from your facility is recycled by being sent to an asphalt company to be burned for energy recovery.
- I also spoke with Mr. Weiss of Vesco pertaining to the determination that your used antifreeze is non-hazardous. Vesco has accumulated analytical data from similar service shops for large trucks and semis over the years and compiled this information to determine that this waste stream is non-hazardous. Mr. Weiss faxed me this analytical on 9-8-08. I have enclosed a copy for your records.
- You stated that you recycle your bulbs by taking them to Granger or Gross Electric. During the time of the CEI, you did not have any spent lamps on-site. During the CEI, I gave you a list with the names of additional lamp recyclers.
- I have enclosed the publication Environmental Compliance Guide for Auto Service Shops which you may find useful. Specifically, pages 7 & 10 discuss the management of spent used oil filters and waste antifreeze.

Pollution Prevention:

- Nollenberger burns used oil on-site in a used oil burner (extra used oil is picked up by Vesco).
- As stated during the CEI, you should consider recycling your properly drained used oil filters.
- If you find additional ways to recycle, reduce, or altogether eliminate the amount of waste that your company generates you may be able to reduce treatment and disposal costs. Furthermore, you may possibly reduce your regulatory requirements. You can find helpful information about pollution prevention at the following web address:
<http://www.epa.state.oh.us/ocapp/ocapp.html>.

Ohio EPA did find validity to this complaint as well as other violations which must be addressed.

Ohio EPA will issue an EPA ID number to track our investigation activity at the property in question. You cannot use this number for manifesting hazardous waste shipments. If you want to use an EPA ID number for manifesting and other hazardous waste, used oil or universal waste activities, you must complete and submit a Notification of Regulated Waste Activity form (*EPA Form 9029 (Rev. 11/2002)*) to Ohio EPA. This form is available on our Web page at <http://www.epa.state.oh.us/dhwm/notiform.html> or you can call me or the Division of Hazardous Waste Management, Central Office, RIS at (614) 644-2977 and we will mail you a copy.

The Division of Hazardous Waste Management (DHWM) has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign-up for this free service. You can find more information at the following Web link <http://www.epa.state.oh.us/dhwm/listserv.html>. Please feel free to share this information with your colleagues.

Mr. George R. Mitchell
September 11, 2008
Page 5

Enclosed you will find a copy of the checklists that I completed during the inspection. Please address all correspondence to Amber Hicks, Ohio EPA, 347 N. Dunbridge Road, Bowling Green, Ohio 43402. Should you have any questions, please feel free to call me at (419) 373-3082.

You can find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm>.

Sincerely,

Amber M. Hicks
Division of Hazardous Waste Management

/llr

REMARKS-GENERAL INFORMATION

General Process Information:

*Facility cited for 52-11.

Regulatory/Enforcement History (if applicable):

Additional P2 remarks and information:

Would this facility be interested in a P2 assessment? Yes* No *If yes, refer promptly to your district P2 coordinator.
 Office of Compliance Assistance and Pollution Prevention - 1-800-329-7518 or p2mail@epa.state.oh.us or www.epa.state.oh.us/ocapp/ocapp.html

Other:

**CONDITIONALLY EXEMPT SMALL QUANTITY GENERATOR REQUIREMENTS
COMPLETE AND ATTACH A PROCESS, WASTE, P2 SUMMARY SHEET**

CESQG: ≤ 100Kg. (Approximately 25-30 gallons) of waste in a calendar month or < 1 Kg. of acutely hazardous waste.
 SQG: Between 100 and 1,000 Kg. (About 25 to under 300 gallons) of waste in a calendar month.
 LQG: ≥ 1,000 Kg. (~300 gallons) of waste in a calendar month or ≥ 1 Kg. of acutely hazardous waste in a calendar month.

NOTE: To convert from gallons to pounds: Amount in gallons x Specific Gravity x 8.345 = Amounts in pounds.

Safety Equipment Used:

WASTE EVALUATION

1.	Have all wastes generated at the facility been adequately evaluated? [3745-52-11]	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
----	--	--

GENERATOR CLASSIFICATION

2.	Does the generator produce <100 kg. of hazardous waste per month? [conditionally exempt small quantity generator ("CESQG")]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
----	--	--

NOTE: If quantities of hazardous waste accumulated on-site at any one time exceed 1,000 Kg. - or the generator produces between 100 and 1,000 Kg. of hazardous waste per month, it is operating as a Small Quantity Generator ("SQG"). If so, complete the Small Quantity Generator Requirements checklist.

OFF-SITE SHIPMENT OF HAZARDOUS WASTE

3.	Does the CESQG ensure delivery of hazardous waste(s) to an off-site permitted TSD? [3734.02(F)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
----	---	--

TREATMENT OF HAZARDOUS WASTE

4.	Does the generator treat hazardous waste in a:	
a.	Container that meets 3745-66-70 to 3745-66-77?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
b.	Tank that meets 3745-66-90 to 3745-66-101 except 3745-66-97(C)?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
c.	Drip pads that meet 3745-69-40 to 3745-69-45?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
d.	Containment building that meets 3745-256-100 to 3745-256-102?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

NOTE: Complete appropriate checklist for each unit.

NOTE: If the CESQG conducts treatment they are subject to the LQG requirements.

NOTE: If waste is treated to meet LDRs, use LDR checklist.

[Facility Name/Inspection Date]

[ID number]

CESQG/ June 2008

Page 1 of 1

SMALL QUANTITY UNIVERSAL WASTE HANDLER REQUIREMENTS

Large Quantity Universal Waste Handler (LQUWH) = 5,000 Kg or more

Small Quantity Universal Waste Handler (SQUWH) = 5,000 Kg or less

PROHIBITIONS

1. Did the SQUWH dispose of universal waste? [3745-273-11(A)] Yes No N/A ___ RMK# ___
2. Did the SQUWH dilute or treat universal waste, except when responding to releases as provided in 3745-273-17 or managing specific wastes as provided in 3745-273-13? [3745-273-11(B)] Yes No N/A ___ RMK# ___

WASTE MANAGEMENT & LABELING/MARKING

UNIVERSAL WASTE LAMPS* (Facility only manages lamps as UW)**

3. Does the SQGUHW contain lamps in containers or packages that are structurally sound, adequate to prevent breakage, and are compatible with contents of the lamps? Are containers or packages closed and do they lack evidence of leakage, spillage or damage that could cause leakage? [3745-273-13(D)(1)] Yes ___ No ___ N/A RMK# 1
4. Are lamps that show evidence of breakage, leakage or damage that could cause a release of mercury or hazardous constituents into the environment immediately cleaned up? Are they placed into a container that is closed, structurally sound, compatible with the contents of the lamps, and lack evidence of leakage spillage or damage that could cause leakage or releases of mercury or hazardous waste constituents to the environment? [3745-273-13(D)(2)] Yes No N/A ___ RMK# ___
5. Are the lamps or containers or packages of lamps labeled with the words "Universal Waste - Lamp(s)" or "Waste Lamp(s)" or "Used Lamp(s)?" [3745-273-14(E)] Yes ___ No ___ N/A RMK# 1

NOTE: Treatment (such as crushing) by a UWH is prohibited under this rule unless the facility is permitted for such activities [3745-273-31(B)]. A generator crushing lamps must manage lamps according to hazardous waste rules (OAC Chapter 3745-52). Lamp crushing is a form of generator treatment (OAC 3745-52-34). Crushed lamps must be transported by a registered hazardous waste transporter to a permitted hazardous waste facility under a hazardous waste manifest.

ACCUMULATION TIME

6. Is the waste accumulated for less than one year? Yes No ___ N/A ___ RMK# ___
[3745-273-15(A)] If not:
- a. Was the waste accumulated over one year in order to facilitate proper recovery, treatment or disposal? (Burden of proof is on the handler to demonstrate) [3745-273-15(B)] Yes ___ No N/A ___ RMK# ___

NOTE: Accumulation is defined as date generated or date received from another handler.

7. Is the length of time the universal waste is stored documented by one of the following: [3745-273-15(C)] Yes No ___ N/A ___ RMK# ___
- a. Marking or labeling the container with the earliest date when the universal waste became a waste or was received? [3745-273-15(C)(1)] Yes ___ No ___ N/A RMK# ___
- b. Marking or labeling individual item(s) of universal waste with the earliest date that it became a waste or was received? [3745-273-15(C)(2)] Yes No ___ N/A RMK# ___
- c. Maintaining an inventory system on-site that identifies the date the universal waste became a waste or was received? [3745-273-15(C)(3)] Yes ___ No N/A RMK# ___

d. Maintaining an inventory system on-site that identifies the earliest date that any universal waste in a group of universal waste items or a group of containers became a universal waste or was received? [3745-273-15(C)(4)]

Yes ___ No N/A RMK# ___

e. Placing the universal waste in a specific accumulation area and identifying the earliest start date or date received? [3745-273-15(C)(5)]

Yes ___ No N/A RMK# ___

f. Any other method, which clearly demonstrates, the length of time the universal waste has been accumulated from the date it became a waste or was received? [3745-273-15(C)(6)]

Yes No N/A ___ RMK# ___

EMPLOYEE TRAINING

8. Are employees who handle or have the responsibility for managing universal waste informed of waste handling/emergency procedures, relative to their responsibilities? [3745-273-16], spillage, or damage? [3745-273-13(B)(1)]

Yes No N/A ___ RMK# ___

RESPONSE TO RELEASES

9. Are releases of universal waste and other residues immediately contained? [3745-273-17(A)]

Yes No N/A ___ RMK# ___

10. Is the material released characterized? [3745-273-17(B)]

Yes No N/A ___ RMK# ___

11. If the material released is a hazardous waste, is it managed as required in OAC Chapters 3745-50 through 3745-69? (If the waste is hazardous, the handler is considered the generator of the waste and is subject to Chapter 3745-52) [3745-273-17 (B)]

Yes No N/A ___ RMK# ___

OFF-SITE SHIPMENTS

NOTE: *If a SQUWH self-transport waste, then they must comply with the Universal Waste transporter requirements.*

12. Are universal wastes sent to either another handler, destination facility or foreign destination? [3745-273-18(A)]

Yes No N/A ___ RMK# ___

NOTE: *SQUWHs are prohibited to send waste to any other facility.*

13. If the universal waste meets the definition of hazardous material under 49 CFR 171-180, are DOT requirements met with regard to package, labels, placards and shipping papers? [3745-273-18(C)] Yes No N/A RMK#
14. Prior to shipping universal waste off-site, does the receiver agree to receive the shipment? [3745-273-18(D)] Yes No N/A RMK#
15. If the universal waste shipped off-site is rejected by another handler or destination facility does the originating handler do one of the following:
- a. Receive the waste back? [3745-273-18(E)(1)] Yes No N/A RMK#
- b. Agree to where the shipment will be sent? [3745-273-18(E)(2)] Yes No N/A RMK#
16. If a handler rejects a partial or full load from another handler, does the receiving handler contact the originating handler and discuss one of the following:
- a. Sending the waste back to the originating handler? [3745-273-18(F)(1)] Yes No N/A RMK#
- b. Sending the shipment to a destination facility? (If both the originating and receiving handler agree) [3745-273-18(F)(2)] Yes No N/A RMK#
17. If the handler received a shipment of hazardous waste that was not universal waste, did the SQUWH immediately notify Ohio EPA? [3745-273-18(G)] Yes No N/A RMK#
18. If the handler received a shipment of nonhazardous, non-universal waste, was the waste managed in accordance with applicable law? [3745-273-18(H)] Yes No N/A RMK#

EXPORTS

19. Is waste being sent to a foreign destination? If so: Yes No N/A RMK#
- a. Does the small quantity handler comply with primary exporter requirements in OAC 3745-52-53, 3745-52-56, and 3745-52-57? [3745-273-20(A)] Yes No N/A RMK#

b. Is waste exported only upon consent of the receiving country and in conformance with U.S. EPA's "Acknowledgment of Consent" as defined in 3745-52-50 to -52-57? [3745-273-20(B)]

Yes ___ No N/A RMK# ___

c. Is a copy of U.S. EPA's "Acknowledgment of Consent" provided to the transporter? [3745-273-20(C)]

Yes ___ No N/A RMK# ___

REMARKS

1. Nollenberger was not currently storing any spent lamps on-site during the CEI.

**USED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

PROHIBITIONS

1.	Does the generator manage used oil in a surface impoundment or waste pile? If yes:	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
a.	Is the surface impoundment or waste pile regulated as a hazardous waste management unit? [3745-279-12(A)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

NOTE: For example, used oil contaminated scrap metal stored in a pile.

2.	Is used oil used as a dust suppressant? [3745-279-12(B)]	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
3.	Is off-specification used oil fuel burned for energy recovery in devices specified in 3745-279-12(C)?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

NOTE: Multiple used oil checklists may be applicable if used oil handler is performing multiple tasks (e.g., if generating used oil and shipping directly to a burner, complete generator and marketer checklists at a minimum).

GENERATOR STANDARDS

4.	Does the generator mix hazardous waste with used oil? If so,	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
a.	Is the mixture managed as specified in 3745-279-10(B)? [3745-279-21(A)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>

NOTE: Used Oil mixed with listed (3745-51-30 to 3745-51-35) or characteristic (3745-51-20 to 3745-51-24) hazardous waste are subject to regulation as a hazardous waste, unless the listed hazardous waste is listed solely because it exhibits a hazardous characteristic, and the resultant mixtures do not exhibit a characteristic. Mixtures of used oil and CESQG hazardous waste are subject to OAC Chapter 3745-279.

5.	Does the generator of a used oil containing greater than 1,000 ppm total halogens manage the used oil as a hazardous waste unless the presumption is rebutted successfully? [3745-279-21(B)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	--	--

NOTE: If used oil contains greater than 1000 ppm total halogens, it is presumed to be listed hazardous waste until the presumption is successfully rebutted.

6.	Does the generator store used oil in tanks; or containers; or a unit(s) subject to regulation as a hazardous waste management unit? [3745-279-22(A)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
7.	Are containers and aboveground tanks used to store used oil in good condition with no visible leaks? [3745-279-22(B)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
8.	Are containers, above ground tanks, and fill pipes used for underground tanks clearly labeled or marked "Used Oil?" [3745-279-22(C)]	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
9.	Has the generator, upon detection of a release of used oil, done the following: [3745-279-22(D)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
a.	Stopped the release?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
b.	Contained the release?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
c.	Cleaned up and properly managed the used oil and other materials?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
d.	Repaired or replaced the containers or tanks prior to returning them to service, if necessary?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>

ON-SITE BURNING IN SPACE HEATER

10.	Does the generator burn used oil in used-oil fired space heaters? [3745-279-23] If so:	
a.	Does the heater burn only used oil that owner/operator generates or used oil received from household do-it-yourself (DIY) used oil generators?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>

b.	Is the heater designed to have a maximum capacity of not more than 0.5 million BTU per hour?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
c.	Are the combustion gases from heater vented to the ambient air?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>

NOTE: Ash accumulated in a space heater must be managed in accordance with 3745-279-10(E).

GENERATOR TRANSPORTATION

11.	Does the generator have the used oil hauled only by transporters that have obtained a U.S. EPA ID#?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
12.	If the generator self-transport used oil to an approved collection site or to an aggregation point owned by the generator: [3745-279-24]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
a.	Does the generator transport used oil in a vehicle owned by the generator or an employee of the generator?[3745-279-24]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
b.	Does the generator transport more than 55 gallons of used oil at any time?[3745-279-24]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

NOTE: Used oil generators may arrange for used oil to be transported by a transporter without a U.S. EPA ID # if the used oil is reclaimed under a contractual agreement (i.e., tolling arrangement).

COLLECTION CENTERS AND AGGREGATION POINTS

13.	Is the DIY used oil collection center in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-30]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
14.	Is the non-DIY used oil collection center registered with Ohio EPA? [3745-279-31]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
15.	Is the used oil aggregation point in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-32]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

NOTE: Complete Used Oil Generator and any other applicable used oil handler checklist (e.g., marketer, burner, etc.) for used oil collection centers and aggregation points.
