Notice of Violation/Return to Compliance

September 12, 2008

Mr. Charles Baumgartner, Environmental Manager
Pilkington North America, Inc.
140 Dixie Highway
Rossford, Ohio 43460

Dear Mr. Baumgartner:

Thank you for accompanying me during Ohio EPA's September 2 and 3, 2008, compliance evaluation inspection of Pilkington North America, Inc. (Pilkington) located at 127 North Walnut Street, Mansfield, Ohio. I inspected Pilkington to determine its compliance with Ohio's hazardous waste laws, as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). The inspection included observations of your company's operations and a review of written documentation.

Pilkington operates two float glass production lines, line 6F1 and 6F3 produce flat glass in for the automotive and architectural markets. The raw materials are weighted, mixed and delivered to the glass melting furnace in calculated batches. The glass batch is melted, formed, annealed, cut and packaged prior to being shipped to the automotive or architectural customer. In addition, Pilkington operates a fabrication operation which utilizes block size flat glass to produce automotive glass components. This process includes cutting, edging, screen printing, bending and tempering of glass. Pilkington is a small quantity generator of hazardous waste in a regular basis. However, Pilkington becomes a large quantity generator of hazardous waste during the months the furnaces are being serviced which lasts approximately three months every two years. Due to this fact, Pilkington chooses to operate as a large quantity generator of hazardous waste. The waste streams generated at the facility include tunnel debris (D007), paint related material (D001, D006, D007, D008, F003, F005) and waste ink/alcohol (D001). In addition, Pilkington generates used oil and universal waste lamps which are sent out to be recycled.

The following violations were found during this inspection. However, since the inspection the listed violations have been corrected and no further action is necessary at this time.

1. **OAC Rule 3745-273-13(D)(1): Storage container requirements for universal waste lamps**

A small quantity handler of universal waste must manage lamps in a way that prevents releases to the environment. Lamps are required to be stored in containers that must remain closed at all times.

Pilkington failed to keep universal waste storage containers closed.

On September 5, 2008, Pilkington submitted photos to show that the universal waste lamps are being stored in containers that are properly closed.
This violation has been abated.

2. **OAC Rule 3745-273-14(E): Labeling of lamp storage container**

A small quantity handler of universal waste must label the container or package in which such lamps are contained with one of the following phrases: "Universal Waste Lamp(s)," "Waste Lamp(s)" or "Used Lamp(s)."

Pilkington failed to label the universal waste lamps storage containers.

On September 5, 2008, Pilkington submitted photos to show that the universal waste lamps are being stored in containers that are properly labeled.

This violation has been abated.

As we discussed during the inspection, you may be able to find other ways to reduce the waste your company generates. If you would like more information on topics concerning pollution prevention, you can visit <http://www.epa.state.oh.us/ocapp/ocapp.html>. If you find additional ways to recycle, reduce, or altogether eliminate the amount of waste that your company generates, you may be able to reduce treatment and disposal costs. In addition, you may possibly reduce your regulatory requirements.

The Division of Hazardous Waste Management (DHWM) has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign up for this free service. You can find more information at <http://www.MPa.state.oh.us/dhwm/listserv.html>. Please feel free to share this information with your colleagues. You can find copies of the rules and other information at <http://www.epa.state.oh.us/dhwm>.

Enclosed, you will find a copy of the checklists that I completed during the inspection. Should you have any questions, please feel free to contact me at (419) 373-3015.

Sincerely,

Edgar V. Pulido
