Attn.: Mr. William Albert

RE: Inspection of March 30, 2011

Dear Mr. Albert:

On March 30, 2011, Dale Warner and I inspected your C&DD facility to determine compliance with Ohio Administrative Code (OAC) Rule 3745-400. At the time of our inspection, it was determined that violations of the aforementioned regulation existed. This violation was verbally expressed to your representative in the office directly following the inspection. Please find the specific violation listed below:

VIOLATION

OAC 3745-400-11(O) Leachate outbreaks. If there is an outbreak of leachate at the surface, the owner or operator shall do all of the following:

- (1) Contain the leachate.
- (2) Manage and dispose the leachate in accordance with applicable regulations.
- (3) Repair the outbreak.

On November 15, 2010, Dale Warner sent you a letter stating that Ohio EPA had observed that the connection between the first cell developed and the most recent construction does not appear to be properly draining leachate and appears to be blocked.

Please investigate the connection between the two cells, and submit to Ohio EPA and Coshocton County Health Department a plan of action addressing the above-mentioned violation within 14 days of receiving this letter. The plan should include a timeline indicating the steps you plan to take in order to abate the violation listed in this letter. If you have any questions or I can be of any assistance, please contact me at (740) 380-5228.

Sincerely,

Erika M. Jackson, R.S.
