RE: COSHOCTON COUNTY  
SFAC - COUNTY ROAD 286 LANDFILL  
(AKA ALBERT'S LANDFILL)

William Albert, Inc.  
General Excavating  
1300 Cassingham Hollow Drive  
Coshocton, Ohio 43812

Attn.: Mr. William Albert

RE: August 31, 2011 Inspection

Dear Mr. Albert:

On August 31, 2011, I inspected your C&DD facility to determine compliance with Ohio Administrative Code (OAC) Rule 3745-400. During my inspection of your facility, I observed the excavated areas that have remained open since July 1, 2011. At the time of my inspection, I observed a large amount of uncovered material in the unloading zone. The material is spread out over the cell as if it were part of the working face, but is labeled as an unloading zone.

**VIOLATIONS:**

OAC rule 3745-400-11(H) Fire prevention. The owner or operator shall operate the facility in a manner that prevents fires by doing one of the following:

- (1) Covering all disposed combustible debris on a weekly basis with soil, clean hard fill, or other material which is noncombustible. For the purpose of this rule, covering means to apply noncombustible material in a manner such that combustible debris is not visible.
- (2) Preparing and utilizing an alternate fire prevention plan acceptable to the licensing authority. The plan shall include the monthly application of noncombustible cover plus another method(s) to prevent fires.

OAC rule 3745-400-11(P) Leachate system management the owner or operator shall operate and maintain the leachate collection system as follows:

The owner or operator shall operate and maintain the leachate collection system as follows:

- (1) The owner or operator shall operate the leachate collection system to maintain no more than one foot of head anywhere on the *in situ* and/or added geologic material or constructed liner with the exception of the sump area(s).

- (2) The owner or operator shall maintain the leachate collection system in such a manner as to prevent blockage or clogging that could impede the proper collection of leachate. If a collection pipe network is utilized in the leachate management system, the owner or operator shall inspect it to verify no crushing or clogging exists after placement of the first lift of debris and annually thereafter.
- (3) The owner or operator shall manage and dispose of leachate in accordance with applicable regulations.

Pursuant to OAC rule 3745-400-11(B)(9) The owner or operator shall keep a daily log of operations of the facility that contains all the information specified on forms prescribed by the director. Please submit a copy of these logs to Coshocton County Health Department and Ohio EPA for review within 14 days of receiving this letter. If you have any questions or I can be of any assistance, please contact me at (740) 380-5228.

Sincerely,

Erika M. Jackson, R.S.  
Environmental Specialist II
