Attn.: Ms. Candy Robinson

**RE: Review of Extension Request and June 2, 2010 Inspection**

Dear Ms. Robinson:

On May 25, 2010, the Ohio Environmental Protection Agency, Southeast District Office, received a request for a 90-day extension to install a flow meter at the inlet of the AMD pond. In accordance with Alteration L, the flow meter was to be installed by June 1, 2010.

On June 2, 2010, I conducted an inspection of the Coshocton Landfill, Inc. to determine if the required flow meter had been installed. At the time of my inspection, it was determined that the flow meter had not been installed as required by your authorizing documents. Therefore, Coshocton Landfill, Inc. is in violation for failure to comply with your authorizing documents as required by the following regulation:

Ohio Administrative Code Rule 3745-27-19(B)(2): The owner or operator shall conduct all construction and operation at a sanitary landfill facility in strict compliance with the applicable authorizing document, including permit to install, a plan approval, an operational report, an approved closure plan, an alteration concurred with in writing by Ohio EPA, or any authorizing document listed in paragraph (l) of rule 3745-27-09 of the Administrative Code, except as follows:

- (a) For a sanitary landfill facility with a permit to install approved after January 1, 1980, but before March 1, 1990, the owner or operator shall conduct all operations in strict compliance with the detail plans, specifications, terms and conditions of an approved permit to install, with the exception, that if the engineered bottom liner/leachate collection system approved in the permit to install is less protective of human health and the environment than the interim composite liner/leachate collection system specified in rule 3745-27-08 of the Administrative Code, the owner or operator shall conduct operations in accordance with the interim composite liner/leachate collection system design required to be installed in response to paragraph (A) of rule 3745-27-20 of the Administrative Code in lieu of the liner/leachate collection system plans, specifications, terms and conditions in an approved permit to install, until such time as an approved permit to install requires compliance with rule 3745-27-08 of the Administrative Code.

**COSHOCTON COUNTY  
COSHOCTON LANDFILL, INC.  
PAGE 2 OF 2**

- (b) For a sanitary landfill facility with a plan approval issued by the Ohio department of health, an operational report submitted in accordance with paragraph (J) or (K) of rule 3745-27-09 of the Administrative Code, as effective July 29, 1976, or a permit to install approved prior to January 1, 1980, the owner or operator shall conduct operations in strict compliance with the plan approval, operational report, or a permit to install, whichever document is applicable, unless either of the following apply:
- (i) The owner or operator of a sanitary landfill facility has obtained a permit to install pursuant to the conditions and schedule outlined in division (A)(3) or (A)(4) of section 3734.05 of the Revised Code.
  - (ii) The composite liner system and the leachate collection and management system approved in the plan approval, operating report, or permit to install is less protective of human health and the environment than the interim composite liner/leachate collection system specified in rule 3745-27-08 of the Administrative Code, in which case, the owner or operator shall conduct operations in accordance with the interim composite liner/leachate collection system design required to be in accordance with paragraph (A) of rule 3745-27-20 of the Administrative Code in lieu of the liner/leachate collection system plans, specifications, terms and conditions in the plan approval, operational report, or permit to install, until such time as an approved permit to install requires compliance with rule 3745-27-08 of the Administrative Code.
- (c) The owner or operator has obtained written concurrence from Ohio EPA for the alteration of the sanitary landfill facility or the owner or operator has obtained a permit to install prior to modifying the sanitary landfill facility.

[Comment: "Alteration" is defined in rule 3745-27-01 of the Administrative Code; "modification" is defined in rule 3745-27-02 of the Administrative Code.]

Please respond within 14 days indicating when the flow meter will be installed. If you have any questions, please contact me at (740) 380-5435.

Sincerely,

  
Dale W. Warner, R.S.  
Environmental Specialist II  
Division of Solid and Infectious Waste Management
