Attn.: Mr. William Albert

RE: Inspection of June 10, 2008

Dear Mr. Albert:

On June 10, 2008, I inspected your C&DD facility to determine compliance with Ohio Administrative Code (OAC) Rule 3745-400. At the time of my inspection, it was determined that violations of the aforementioned regulation existed. These violations were verbally expressed to your office directly following my inspection. Please find the specific violations listed below:

**VIOLATIONS**

- 1) OAC 3745-400-11(B)(1) requires an owner or operator to strictly comply with the license and authorizing documents. Albert's failure to maintain compliance is a violation of this requirement.
- 2) OAC 3745-400-11(P)(1) requires an owner or operator to operate the leachate collection system in such a manner that no more than one foot of head is on the liner. At the time of my inspection, the high level indicator was fully elevated this is an indication that more than a foot of head of leachate was in contact with the liner in violation of this regulation. Pumping must be conducted frequently enough to maintain the leachate collection system such that no more than a foot of head is on the liner at anytime.

If you have any questions or I can be of any assistance, please feel free to contact me at (740) 380-5435.

Sincerely,

Dale W. Warner, R.S.
