Dear Mr. Hensley:

Thank you for your July 13, 2011 response (dated July 1, 2011) to Ohio EPA's March 4, 2011 Notice of Violation letter. The documentation you submitted included photographic documentation demonstrating that emergency contact information has been posted and a spill control equipment station has been created near the hazardous waste accumulation area. You also submitted a copy of the container accumulation area and spill kit inspection log indicating weekly inspections are being done. The letter also includes the statement that Sherwood Valve has chosen to manage used lamps through recycling and will ship used lamps quarterly.

My review of this documentation reveals that Sherwood Valve has now abated all violations discovered during the February 24, 2011 inspection as listed below.
